Incident Management Situation Report
Sunday November 22, 2026 – 0730 MDT
National Preparedness Level 1

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (47 fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires:	5
CIMTs committed:	0
NIMOs committed:	0

Southern Area (PL 2)

Fire Activity and Teams Assigned	**Totals**
New fires:	36
New large incidents:	2
Uncontained large fires:	4

*** White Oak Flat**, George Washington & Jefferson NF, USFS. Two miles northwest of Clifton Forge, VA. Hardwood litter, brush and dormant brush. Active fire behavior with short-range spotting, running and flanking. Structures and communication infrastructure threatened. Road and trail closures in effect.

Bee Haven 2 24-06, Florida Forest Service. Twenty-eight miles northwest of Lake City, FL. Southern rough. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

*** Elk Shoals**, North Carolina Forest Service. Seven miles northwest of Burnsville, NC. Hardwood litter. Active fire behavior with running. Last report unless significant activity occurs.

Greene Caney Creek Lane, Tennessee DOF. Three miles northeast of Baileyton, TN. Hardwood litter. No new information.

TOTAL FIRES:		**3,010**	**2,580**	**205**	**398**	**58,494**	**5,662**	**70,349**
TOTAL ACRES:		**436,669**	**3,406,879**	**98,892**	**92,662**	**3,887,187**	**1,577,984**	**9,500,272**

Ten Year Average	Quantity	% of Ten Year Average
Fires (2016 – 2025 as of today)	**54,334**	**129%**
Acres (2016 – 2025 as of today)	**6,571,508**	**145%**

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Low relative humidity in the southern Appalachians will ease today, but some values of 20-30% will persist on the Cumberland Plateau. A coastal storm will continue to move north just off the East Coast, with heavy rain from North Carolina into New England within 150 miles of the coast. Breezy northeast winds will also occur with the storm. A cold front will slowly move east through the Mississippi Valley and Great Lakes with scattered showers and isolated thunderstorms, with most rainfall amounts light. Mostly dry conditions are expected in the Southwest and Plains, while a weakening cold front brings scattered showers and thunderstorms to California and the northern half of the West, with snow levels from 5,000 feet in the Sierra to 2,000 feet near the Canadian border. Mostly dry conditions will occur in Alaska except for light showers in southwest Alaska with colder temperatures. In Hawai'i, breezy to strong trade winds will continue with more stable conditions resulting in fewer windward showers.
