EASTERN AREA LARGE FIRES:

CROW'S NEST, New York State. This fire is located on the northern edge of the West Point Military Reservation, two miles south of Cornwall-on-Hudson, New York. The fire is burning in an area that has been used as an artillery impact area for the U.S. Military Academy since

the 1830's. This fire remains at 900 acres and is now 60 percent contained. The area received some precipitation yesterday. Dozer and handlines were completed in preparation for a burnout operation scheduled for today. Suppression activities are being conducted jointly by the Palisades Interstate Park Commission, New York State Department of Environmental Conservation, Department of Defense - West Point, New York National Guard and local volunteer fire departments.

OUTLOOK:

An upper level low pressure area will move from the Great Basin into the upper plains this morning. Residual moisture from the low pressure area, coupled with surface heating will bring the chance of scattered showers and thunderstorms to the Great Basin this afternoon.

Another upper level low pressure area will form off the pacific northwest coast which will generate scattered showers and thunderstorms along the Cascades.

High temperatures will be in the 60's along the coast, mid 60's to the lower 80's in the mountains, mid 80's to upper 90's in the lower valleys of north and central Nevada, and near 105 in southern Nevada.

Minimum relative humidities will range from 50 percent along the coast to around 20 percent in the inland valleys. Winds will be light away from the thunderstorms.
