

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY MAY 22, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 167 new fires reported yesterday. One new large fire was reported in the Southern Area. One large fire was contained in the Southwest Area. Very high to extreme fire indices were reported in Arizona, New Mexico, Oklahoma, and Texas.

SOUTHWEST AREA LARGE FIRES:

ROUND, Coconino National Forest. A Type 2 Incident Management Team (Waldrip) is assigned. The fire is burning in mixed conifer and chaparral eight miles northwest of Sedona, AZ. Minimal fire activity was observed yesterday. Extreme terrain where the fire is located is hampering containment efforts, and presents safety concerns. No significant change occurred.

AZS = Arizona State Land Department

SOUTHERN AREA LARGE FIRES:

THE ALLEY FIRE, Florida Division of Forestry. The fire is burning in grass three miles north of Alligator Alley and five miles west of US Highway 27. This fire is in an inaccessible conservation area and poses no threat to structures.

OUTLOOK:

Weather Discussion: High pressure will continue to build over the western states today, keeping most of California and the Great Basin dry with warming temperatures. However, warmer temperatures and increasing instability will lead to isolated afternoon showers and thunderstorms around the southern Rockies. Some dry thunderstorms are possible in this air mass especially along the Arizona and New Mexico border. In the southeast and east, a warm and humid air mass will cause showers and thunderstorms from northern Florida to the Delmarva Peninsula. A weak front will provide light showers to central Minnesota and Iowa today. Clouds will be on the increase in Alaska, with some showers possible mainly across the eastern half of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Areas of morning low clouds and fog coastal areas, otherwise sunny	75-95 Mountains 92-102 Valleys 95-115 Deserts	10-20% Mountains 10-20% Valleys 5-15% Deserts	SW-NW 5 to 15 mph

EASTERN AREA Partly sunny over Maine where elevated fire potential is expected	58 to 67	32 to 42%	Northeast 10 to 15 mph
SOUTHWEST AREA Partly to mostly sunny. Isolated dry thunderstorms across central and eastern AZ and western NM, isolated thunderstorms with wetting rainfall eastern NM and west TX.	70s to 80 mountains, low 80s to low 90s lower elevations of NM and TX, high 90s to 108 AZ deserts.	5-20% west, 15-35% east.	Terrain driven across AZ at 5-10 mph, Southwest to Southeast at 5-15 mph remainder.

THUNDERSTORM SAFETY

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
 - The best position is sitting on the pack or crouching with feet close together.
 - Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
 - Avoid grouping together. Keep a minimum of 15 feet between people when possible.
 - Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!

- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.

- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.

- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.

- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.

- Put down all tools.

- Take shelter in vehicles if possible.
