

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY AUGUST 5, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was light nationally, with 176 new fires were reported. One new large fire was reported in the Northern California Area. Four large fires were contained, one each in the Northern Rockies and Eastern Great Basin Areas and two in the Rocky Mountain Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex and Ross Creek fires on the Flathead and Kootenai National Forests, and the Glacier National Park.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuels, 20 miles east of Eureka, MT. Minimal fire behavior was observed. Crews have completed indirect fireline in the north and northwest flanks and are mopping up 200 feet inside the perimeter on the south flank. Structure protection is in place for 100 residences.

ROBERT, Flathead National Forest. A transfer of command from Stam's Type 1 Incident Management Team to Ferguson's Type 1 Incident Management Team will occur on 8/6. This fire will remain under a unified command between Ferguson's Type 1 Incident Management Team and Flathead County. This fire is in timber, 8 miles north of Columbia Falls, MT. Rain showers have moderated fire behavior. Heavy fuels continued to burn as surface fire spread progressed beneath timber stands. Crews continued to mop up along the east flank in the vicinity of Apgar Village and Glacier National Park Headquarters. Progress on the west and northeast flanks is hampered by difficult terrain and fuel conditions. Structure protection is in place for six commercial properties.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. Both the Trapper Creek and the Wolf Gun fires are burning through old burns. Slow burning surface fire due to light rain was observed. Crews made good progress constructing fireline on the south flank of the Trapper Creek fire. Personnel are scouting the Wolf Gun fire in preparation for direct attack with hand crews. The major road through Glacier National Park (Going to the Sun Highway from West Glacier Gate to Logan Pass) will be opened on a controlled basis beginning today between the hours of 1000 and 1800. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, and Lethbridge, Alberta, Canada. Structure protection is in place for three commercial properties.

LITTLE SALMON CREEK COMPLEX, Flathead National Forest. A transfer of command from Cook's Fire Use Management Team to Rath's Fire Use Management Team will occur today at 1800. This lightning-caused Wildland Fire Use (WFU) complex, which began on July 19, is being managed to accomplish resource objectives. The complex is in fir and lodgepole pine, 47 miles southeast of Kalispell, MT. Single tree torching, creeping and smoldering were observed. Structure protection is in place for six residences. This will be the last narrative report unless significant activity occurs.

BOOTH, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire is 17 miles south of Colstrip, MT. Minimal fire behavior was observed in grass and timber.

SLIMS, Nez Perce National Forest. A Type 1 Incident Management Team (Mortier) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Minimal fire behavior with occasional torching and flare-ups was observed. Crews are securing the west side of the Meadow Creek drainage.

TREASURE COUNTY COMPLEX, Southern Land Office, Montana Department of Natural Resources and Conservation. This complex is comprised of the Johnny, Earl and Starks fires. These fires are in ponderosa pine, down and dead fuels, sagebrush and grass, eight miles south of Hysham, MT. Cloud cover limited fire activity. Crews are mopping up the Johnny fire; the Earl and Starks fires are in patrol status. Structure protection is in place for 15 residences and two commercial properties. Decrease in acreage is due to more accurate mapping.

TOBOGGAN, Idaho Panhandle National Forest. A Type 2 Incident Management Team (Larsen) is assigned. This fire is 12 miles northeast of Wallace, ID. Creeping fire in duff was observed. Increase in acreage is due to more accurate mapping.

BLACK FROG COMPLEX, Bitterroot National Forest. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Blackwall and Frog Pond fires, is in lodgepole pine and mixed conifer with dead and down fuels, 34 miles south of Hamilton, MT. Minimal fire behavior was observed. Evacuations from Moose Meadows remain in place. Highway 93 from Lost Trail Pass to Gibbonsville is open without restrictions. Highway 43 is open from Lost Trail Pass, east.

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Minimal fire behavior with occasional torching was observed.

EASTERN GREAT BASIN AREA LARGE FIRES:

HOT CREEK, Boise National Forest. A transfer of command from Sexton's Type 1 Incident Management Team to Hart's Type 1 Incident Management Team will take place on 8/7. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Minimal fire behavior due to lower temperatures and higher humidity was observed. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties. The middle Fork Boise River Road remains Closed due to mudslides resulting from rain over the fire area. James Creek Road is currently the only road access into Atlanta and is closed to all but essential fire traffic.

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This fire is comprised of the Grimmet and North Fork Lick fires. These fires are in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. Fires are being managed in a confine/contain strategy. The Grimmet fire is contained. Minimal fire behavior was observed.

LOST PACKER COMPLEX, Salmon-Challis National Forest. This complex, comprised of the Waugh, Upper West Horse and Horse fires, is 36 miles northwest of Salmon, ID. Minimal fire behavior with single and group tree torching was observed in sub-alpine fir, mixed conifer and grass. Fires are in monitor status.

JOE HATCH, Moab Field Office, Bureau of Land Management. This fire is in Douglas fir and mountain brush, 25 miles north of Green River, UT. No new information was received. This will be the last report unless new information is received.

NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A transfer of command from Anderson's Type 1 Incident Management Team to Lohrey's Type 1 Management Team will take place on 8/5. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Fire activity increased due to clearer skies. Upslope runs in the late afternoon with torching and crowning were observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
FAWN PEAK COMPLEX	WA	OWF	76,549	57	UNK	1,022	25	18	15	0	31.6M

ROCKY MOUNTAIN AREA LARGE FIRES:

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Higher relative humidity has decreased fire behavior; backing fire was observed in Poison Creek. Structure protection is in place for 6 residences.

BLUE RIVER COMPLEX	AZ	ASF	18,550	75	UNK	1	0	0	0	0	6.3M

OUTLOOK:

RED FLAG WARNING: for winds and low humidity over portions of western Utah.

Weather Discussion: A low pressure system moving up the west coast is spreading moisture into the Pacific Northwest. Meanwhile, a dry southwest flow covers much of rest of the west. High pressure remains centered over New Mexico with very limited moisture over the southwest states.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Breezy with a chance of showers and thunderstorms in Idaho, mainly over the mountains. Otherwise, generally warming and drying with a slight chance of mountain thunderstorms.	Idaho, Bridger-Teton: 70 to 86 mountains, 80 to 91 valleys. Utah and Arizona Strip: 75 to 92 higher elevations, 92 to 106 valleys.	Idaho, Bridger-Teton: 18 to 35% mountains, 16 to 28% valleys. Utah, Arizona Strip: 12 to 30% mountains, 6 to 20% valleys.	Southwest 10 to 25 mph over western Utah, Snake River Plain, and ridgelines. Upslope or southwest 5 to 15 mph elsewhere.
NORTHERN ROCKIES AREA Partly cloudy. Showers and thunderstorms developing mainly Idaho and western Montana. Mostly sunny elsewhere.	West of the Divide: 80 to 90 East of the Divide: 75 to 95	15 to 25%	West of the Divide: South to southwest 5 to 10 mph. East of the Divide: Shifting southeast to east 5 to 15 mph during the afternoon.
NORTHWEST AREA Partly to mostly cloudy, with scattered thunderstorms.	Highs in the 70s and 80s.	35 to 60% western sections, 25 to 35% east. Some upper teens in northern Washington.	Generally less than 15 mph.
ROCKY MOUNTAIN AREA Isolated thunderstorms over Colorado mountains, front range and the plains also isolated storms over northern Wyoming.	Highs in the 85 to 95 over most of the rocky mountain area. High elevation 75 to 85.	12 to 18% lower elevations of western slope of Colorado and southwest, central Wyoming and 20 to 40% elsewhere.	North-northwest 8 to 18 mph over South Dakota. Variable, 5 to 15 mph elsewhere.
SOUTHERN CALIFORNIA AREA Morning coastal fog, otherwise sunny.	65 to 80 coastal areas. 75 to 90 mountains. 85 to 95 valleys. 90s upper desert. 95 to 110 low desert.	10 to 20% mountains and deserts. 20 to 35% valleys. 40 to 50% coast.	Southwest 10 to 20 mph.
SOUTHWEST AREA Partly cloudy. Widely scattered thunderstorms, most numerous central / northern New Mexico.	80s and 90s mountains, 90s to near 105 lower elevations.	15 to 25%, except 30% and above parts of north/central Arizona, northeast/eastern New Mexico and western Texas.	Variable to upslope 5 to 15 mph, except east to southeast 10 to 20 mph across northern New Mexico and northwest Texas.
WESTERN GREAT BASIN AREA Partly cloudy with an isolated dry thunderstorm along the northern border country otherwise the remainder of the state will be mostly sunny with a breezy to windy afternoon.	80s to 90s in the lower elevations, upper 60s to 70s in the upper elevations, 103 in the southern deserts.	8 to 20% at lower elevations, 10 to 25% in upper elevations, and 18 to 38% in the Sierras.	South to Southwest 10 to 25 mph and gusting to 35 mph.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Every firefighter will give and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?

- Did they take notes? What kind of information would you like to see people write down?

- Did they repeat information back? What other ways can you identify that your briefing is registering?

- Did you give all the necessary information? How will you ensure that you covered everything necessary?
 - Task
 - Location
 - Communications
 - Hazards
 - Who, when, etc.

- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
 - Did you really listen? What do you do to make yourself pay attention to everything being said?
 - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?

- To reduce the risks, take the time and get it right!

- You must know the location of the assignment and:
 - What is to be done.
 - Who you are to report to and how often to report.
 - When you are expected to complete the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.
