

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, OCTOBER 1, 2003 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was moderate in the Southern California Area and light elsewhere. Nationally, 84 new fires were reported. Four new large fires were reported in the Southern Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, and Washington.

Hurricane Isabel, Virginia. A Type 1 Incident Management Team (Ferguson) is assigned to provide logistical, operational, planning and resource support. The team will work jointly with GSA, FEMA and the Army Corp of Engineers, at Ft. A.P. Hill in Virginia. The National Park Service All Risk Management Team (Swed) is assigned. The team is assessing hurricane damage and support needs for National Parks in North Carolina and Virginia.

Hurricane Isabel, North Carolina. Three Type 2 Incident Management Teams (Wathen/Pearson, Collins/Col. Holt/Hendricks) are assigned. The Governor of North Carolina has declared a State of Emergency for 12 counties. A Federal Disaster Declaration was made on 9/18. Through Unified Command, personnel are providing logistical, operational, planning and resource support.

NORTHERN CALIFORNIA AREA LARGE FIRES:

SPANISH, Mendocino National Forest. A Type 2 Incident Management Team (Walker) is assigned. This fire is in timber and heavy logging slash, 36 miles east of Laytonville, CA. Moderate rates of spread with torching, crowning and spotting were observed. The forest is closed in the area of the fire.

CANOE / HONEYDEW, Humboldt-Del Norte Unit, California Department of Forestry & Fire Protection (CDF). A CDF Type 1 Incident Command Team (Hawkins) is assigned. The fires are in old growth redwood, brush and logging slash, 18 miles northwest of Garberville, CA. Fire activity increased from yesterday as weather conditions became less favorable. Structure protection is in place for 177 residences.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

CANOE / HONEYDEW	CA	HUU	21,917	85	10/6	2,133	62	133	16	0	25.2M

NORTHWEST AREA LARGE FIRES:

NEEDLES, Okanogan/Wenatchee National Forest. A Type 2 Incident Management Team (Furlong) is assigned. This fire is in timber and heavy downed fuels, 12 miles northwest of Winthrop, WA. The fire remained active with torching, spotting and small crown runs. All trails in the vicinity of the fire and the road to Hart's Pass remained closed.

CRYSTAL CREEK, Okanogan/Wenatchee National Forest. A Washington Incident Management Team (Berndt/Baarspul) is assigned. This fire is in mixed conifer with dead and downed fuels, six miles southwest of Leavenworth, WA. The fire continued to creep and smolder. Structure protection is in place for 110 residences and two commercial properties. The increase in acreage is due to more accurate mapping.

ISABEL, Okanogan/Wenatchee National Forest. A Washington Interagency Incident Management Team (Johnson/Barnett) is assigned. This fire is in timber, seven miles west of Conconully, WA. Single tree torching and some short runs were observed.

B&B COMPLEX, Deschutes National Forest. This complex, comprised of the Booth and Bear Butte fires, is in timber with heavy ground fuels 14 miles west of Sisters, OR. Minimal fire behavior continued with isolated torching within current perimeters.

GRIFF, Olympic National Park. This fire is in timber, nine miles south of Port Angeles, WA. Torching and spotting were observed in steep, inaccessible terrain.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

KIBBIE COMPLEX, Yosemite National Park. A Type 2 Incident Management Team (Rios) is assigned. This complex is in ponderosa pine, mixed conifer and brush, 28 miles west/northwest of Sonora, CA. Fire behavior was moderate on the Tuolumne fire.

HOMERS NOSE 2, Sequoia & Kings Canyon National Park. A Fire Use Management Team (Bonefeld) is assigned. This fire is in mixed brush and ponderosa pine, 40 miles east of Visalia, CA. Minimal fire spread was reported.

DUNCAN COMPLEX, Yosemite National Park. This previously reported lightning-caused Wildland Fire Use (WFU) complex, which began on 7/19, is in red fir, lodgepole pine and chaparral, two miles north of Yosemite Village, CA. This incident is being managed to accomplish resource objectives. The Whiskey and Snow fires are the only remaining active fires within the complex. The fire was mainly backing off a prominent ridge. Surfaces spread rates remained low.

SOUTHWEST AREA LARGE FIRES

POPLAR COMPLEX, Grand Canyon National Park. A transfer of command from Rath's Fire Use Management Team to Van Bateman's Type 2 Incident Management Team occurred yesterday. This previously reported lightning-caused Wildland Fire Use (WFU) complex, which began on 9/4, is in timber with heavy dead and downed fuels, on the North Rim of the Grand Canyon. This incident is being managed to accomplish resource objectives. The Polar fire made some small upslope runs on the north and east flanks; the Big fire continued to back downhill to the south; and the Corral fire is contained.

SOUTHERN AREA LARGE FIRES

ROCKING CHAIR RANCH, Texas Forest Service. This wind-driven fire is in open grassland, four miles west of Childress, TX.

WEATHERLY, Texas Forest Service. This fire is in open grassland, 75 miles northeast of Lubbock, TX. The fire made significant runs due to the high winds.

FERREL, Texas Forest Service. This fire is in open grassland, 75 miles northeast of Lubbock, TX. The fire made significant runs due to the high winds. Structure protection is in place for one residence.

HULVER, Texas Forest Service. This fire is in open grassland, 75 miles northeast of Lubbock, TX. The fire made significant runs due to the high winds.

OUTLOOK:

Weather Discussion: High pressure over the interior west will give way to a low pressure system that will be tracking into the Great Basin today into Friday. The low will produce scattered showers and thunderstorms primarily across the western Great Basin. In California, temperatures will be returning to normal as the low pulls onshore. In the Florida Panhandle, dry northeast flow will produce low relative humidity along with breezy conditions.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>NORTHERN CALIFORNIA AREA A few afternoon cumulus over the higher terrain along and east of the Cascade-Sierra crest, with a slight chance of showers or thunderstorms. Otherwise, mostly sunny with low clouds and fog near the coast.</p>	60s and 70s near the coast and higher terrain, and 80s inland valleys.	12 to 22% east of the Cascade-Sierra crest.	South to southwest 5 to 10 mph with a few higher gusts most areas. Over the higher elevations and east of the Sierra Cascade crest southwest 7 to 15 mph with gusts 25 to 35 mph.
<p>SOUTHERN CALIFORNIA AREA Morning low clouds and fog coastal basins, otherwise sunny.</p>	65 to 75 coastal areas. 75 to 85 mountains. 80s valleys. 85 to 90 upper desert. 97 to 103 low desert.	10 to 20% desert. 15 to 30% mountains. 30 to 45% valleys. 50 to 65% coast.	Southwest to west 10 to 20 mph except southwest to northwest 5 to 15 mph coastal areas.
<p>EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Mostly sunny with above normal temperatures. Utah, Arizona Strip: Mostly sunny with above normal temperatures.</p>	Idaho, Bridger-Teton: 58 to 71 mountains, 71 to 85 valleys. Utah and Arizona Strip: 65 to 78 mountains, 78 to 97 valleys.	Idaho, Bridger-Teton: 11 to 25% valleys, 15 to 30% mountains. Utah, Arizona Strip: 10 to 23%	Idaho, Bridger-Teton: Upslope and light. Utah, Arizona Strip: Upslope and light.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area
- Identification of alternative traffic routes as part of the incident/project traffic plan
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
