

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JANUARY 30, 2004 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate in Southern Area and light nationally, with 726 new fires reported for the week.

SOUTHERN AREA LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
UNIT 6 - WF - 04	LA	SBR	3,068	100	---	5	0	2	1	0	NR
JEFFERS	LA	KIF	160	100	---	15	0	3	1	0	NR
STAR HOLLOW FIRE	OK	OKS	120	100	---	2	0	1	0	0	NR

SBR = Sabine National Wildlife Refuge
KIF = Kisatchie National Forest
OKS = Oklahoma Division of Forestry

EASTERN AREA LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
SAVANNA LAKE	MD	MDS	300	100	---	2	0	1	0	0	NR

MDS = Maryland Department of Natural Resources

OUTLOOK:

Weather Discussion: In the Southern Area during the upcoming week, a pattern of rain every 3-5 days is setting up. Low pressure systems will develop in south or west Texas and then move nearly eastward. These are ideal circumstances for repeated rains across the southeast. Occasionally, the air will be cold enough on the northern fringes of the system to produce snow or ice but the bulk of the precipitation will fall as rain. In Southern California, a series of pacific troughs will bring cool temperatures and above normal humidity through the middle of next week.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Areas of low clouds and fog lower elevations, otherwise partly to mostly cloudy with a chance of showers over the far northern portion of the region. The snow level will be around 6,000 feet.	55 to 70 coastal areas. 40 to 55 mountains. 55 to 70 valleys. 55 to 65 upper deserts. 65 to 75 low deserts.	30 to 50%.	Southwest to northwest 10 to 20 mph.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area
- Identification of alternative traffic routes as part of the incident/project traffic plan
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
