

**INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, JULY 28, 2005 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 163 fires reported. Four new large fires were reported, two in the Southern California Area and one each in the Northwest and Rocky Mountain Areas. Twelve large fires were contained, four in the Northwest Area, two each in the Northern Rockies, Southern California and Southern Areas, and one each in the Eastern Great Basin and Northern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Montana, Nebraska, New Mexico, Oregon, South Dakota, Utah and Washington.

**NORTHWEST AREA INCIDENTS / LARGE FIRES:**

BLOSSOM COMPLEX, Siskiyou National Forest. A Type 2 Incident Management Team (Paul) is assigned. This complex comprised of the Huggins, Blossom and Solitude fires is 25 miles northeast of Gold Beach, OR in timber. Structure protection for lodges along the Rogue River is in place. Short runs and torching increased the acreage of the Blossom and Solitude fires.

WASSON, Oregon Department of Forestry. This fire is 15 miles east of Eagle Point, OR in grass and timber. No further information was received.

WFS = Washington State Fire Service

**EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

FALLS CREEK, Salmon-Challis National Forest. A Fire Use Management Team (Weldon) is assigned. This fire is being managed using a confine/contain strategy. The fire is 25 miles northeast of Challis, ID in timber and grass. Extreme fire behavior with high intensity crown runs to the ridge top between Falls Creek and Morse Creek was observed.

DAMMERON COMPLEX, Cedar City Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Sexton) is assigned. This complex, comprised of the Dammeron, Mill Creek, Yant and Stahlie fires, is five miles north of St. George, UT in mixed conifer, pinyon, juniper and grass. The St. George municipal watershed and cultural sites remain threatened. Smoldering and creeping were reported. The Yant and Mill Creek fires are being patrolled by air.

### NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

BAKER, Northwestern Land Office, Montana State. A Type 2 Incident Management Team (Cowin) is assigned. This fire is near the town of Plains, MT. Ground fire with occasional single and group tree torching was observed. Rocky terrain and heavy fuels are hampering containment efforts.

BIG HORN, Crow Agency, Bureau of Indian Affairs. This fire is 44 miles southeast of Billings, MT in timber, juniper and sagebrush. Unimproved roads, steep terrain and travel distances continue to hinder containment efforts. Smoldering in heavy fuels was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

BDF = Beaverhead/Deerlodge National Forest      LED = Lewistown Field Office, Bureau of Land Management

### ROCKY MOUNTAIN AREA INCIDENTS / LARGE FIRES:

SOUTH SUNDANCE COMPLEX, Black Hills National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This complex is being managed concurrently with the Old Hill City Road fire, and is comprised of the Sheep Nose, Hemler, Allison, Cement and Spring Draw fires. The complex is 15 miles southeast of Sundance, WY in hardwood litter. Slippery roads and rolling rocks continue to hamper containment efforts. Heavy fuels in the interior continue to smolder.

COMMISSARY, Grand Mesa/Uncompahgre/Gunnison National Forest. This fire is 22 miles west of Gunnison, CO in hardwood litter. A road closure for Soap Creek is in effect. Steep slopes with numerous snags are hindering containment efforts. Isolated torching and moderate rates of spread were reported. The fire is being managed using a confine/contain strategy.

OLD HILL CITY RD, Division of Forestry, South Dakota State. A Type 2 Incident Management Team (Mullenix) is assigned. This fire is three miles northwest of Keystone, SD in hardwood litter. This fire is being managed in conjunction with the South Sundance Complex. Smoke continues to impact the Mount Rushmore National Memorial airshed. Minimal fire behavior was reported. The reduction in acreage is due to more accurate mapping.

PACK TRAIL COMPLEX, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Pack Trail, West Jordon and Smith Gulch fires, is being managed to accomplish resource objectives. This complex is 10 miles west of Meeker, CO in timber litter and brush. Fire activity was limited to smoldering on the West Jordan fire. The Rich Budd fire was contained.

### **SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

PEACHVILLE, Tonto National Forest. This fire is four miles north of Superior, AZ in chaparral. Minimal fire activity was reported. No further information was received.

BARFOOT, Coronado National Forest. This fire is 35 miles southwest of Willcox, AZ in mixed conifer. Steep, rugged terrain continues to limit access. The incident continues to receive precipitation.

BEAR, San Carlos Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Smith) is assigned. This fire is 30 miles north of San Carlos, AZ in chaparral, pinyon, juniper and brush. Rangeland and wildlife habitat remain threatened. Multiple lightning-caused fires continue to be suppressed by incident resources.

CLAY TANK, Truxton Canyon Agency, Bureau of Indian Affairs. This fire is 40 miles northwest of Peach Springs, AZ in cheatgrass and sage. The fire is in monitor status. No new information was received. This will be the last report unless new information is received.

KNOLES, Tonto National Forest. This fire is 17 miles south of Young, AZ in timber litter. No new information was received.

### SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

PINYON COMPLEX, Inyo National Forest. This complex, comprised of the Oak Creek, Pinyon and Hogback fires is six miles northwest of Independence, CA in timber and brush. Sawmill Trail remains closed to the public. Active fire behavior with isolated torching was reported.

COMB, Sequoia & Kings Canyon National Park. A Fire Use Management Team (Hall) has been ordered. This lightning-caused Wildland Fire Use (WFU) is being managed to accomplish resource objectives. This fire is 18 miles northeast of Grand Grove, CA in hardwood litter, mixed conifer, and chaparral. Trail closures in the Lewis Creek area are in effect. Active backing fire with occasional short runs in brush and torching were observed.

### ALASKA AREA INCIDENTS / LARGE FIRES:

FOX CREEK, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. This incident is being managed to accomplish resource objectives. This fire is 35 miles southeast of Soldotna, AK in beetle-killed spruce, hardwoods and timber litter. This fire is in monitor status. Smoke is impacting the communities of Soldotna, Kasilof, Homer, Anchor Point, Happy Valley, Anchorage and Tustumena Lake recreational users. Smoldering and creeping were observed.

MISSION CREEK, Alaska Fire Service, Upper Yukon Zone. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is being managed in conjunction with the Boundary Creek fire. This fire started on Alaska Native Claims Settlement Act land nine miles west of Eagle, AK in black spruce and tundra. Structures in and around Eagle remain threatened. Difficult terrain and lack of water sources continue to hinder control efforts. A spot fire was contained. Single and group tree torching were observed.

BOUNDARY CREEK, Alaska Fire Service, Upper Yukon Zone. A Type 2 Incident Management Team (Chrisman) is assigned. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce and hardwood litter. A portion of the fire is in Canada. Structures and native allotments remain threatened. Minimal fire behavior with backing and torching was reported.

### OUTLOOK:

**Red Flag Warning:** For high Haines indices and poor relative humidity recovery for southwest Idaho.

**Fire Weather Watch:** For low relative humidity and isolated thunderstorms and lightning in southern Montana and north-central Idaho.

Northern Wyoming mountains for dry lightning.

Central and east-central Nevada for afternoon and evening dry lightning.

Northwest Utah for isolated dry lightning.

**Weather Discussion:** High pressure over the west will continue to bring hot weather to much of the area. Moisture over the Southwest will begin to slowly spread north while an upper level trough tracks across the Pacific Northwest. This will lead to an overall upswing in thunderstorm activity, some of which may produce dry lightning. High pressure will continue over the Alaska interior.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Southwest</b> Partly cloudy. Isolated to scattered thunderstorms.	70 to 85 mountains. 85 to 105 lower elevations.	10 to 20% northern Arizona and northwest New Mexico. 20 to 35% elsewhere.	Variable 5 to 15 mph with gusts to 25 mph Arizona and western New Mexico. South to southeast 10 to 20 mph eastern New Mexico and west Texas.
<b>Western Basin</b> Partly cloudy with isolated to scattered showers and thunderstorms. Central and eastern Nevada thunderstorms will be dry.	North valleys: 85 to 101. South valleys: 90 to 108. Mountains: 72 to 86.	North valleys: 9 to 12% South valleys: 16 to 26% Mountains: 18 to 35%	South to west at 7 to 15 mph. Northwestern half of the state will have southwesterly afternoon gusts at 25 to 35 mph.
<b>Northern California</b> Sunny to partly cloudy. Slight chance of afternoon and evening thunderstorms in the northern and eastern mountains.	90s to near 103 in warmest inland valleys.	8 to 27% driest inland areas.	Variable, 5 to 15 mph, locally gusting to around 25 mph in the northeast and eastside areas.
<b>Northern Rockies</b> Upper level ridge over geographic area will produce warm and dry conditions. A disturbance in the southwest flow may trigger some isolated afternoon thunderstorms over the mountains of central Idaho and across southern Montana.	West of divide: 85 to 90. East of divide: 80 to 90. North Dakota: 75 to 85.	West of divide: 15 to 20%. East of divide: 20 to 35%. North Dakota: 35 to 50%.	West of divide: west 5 to 10 mph. East of divide: light and variable. North Dakota: east 5 to 10 mph.
<b>Rocky Mountain</b> Mainly dry, except isolated mountain thunderstorms extreme north and south portions.	Lower to mid 90s Mountains mid 70s and 80s.	8 to 20%.	West 10 to 20 mph western portions, with variable winds 5 to 15 mph in the east.
<b>Eastern Great Basin</b> Mostly sunny-partly cloudy region wide. Warmer. isolated afternoon thunderstorms, mainly over the mountains.	Idaho, Bridger-Teton: 73 to 87 mountains, 89 to 103 valleys. Northern Utah: 72 to 90 mountains, 89 to 103 valleys. Southern Utah, Arizona strip: 74 to 90 mountains, 90 to 108 valleys	Idaho, Bridger-Teton: 13 to 21% mountains. 10% valleys. Northern Utah: 19 to 25% mountains. 8 to 19% valleys. Southern Utah, Arizona strip: 20 to 30% mountains. 9 to 24% valleys.	Idaho, Bridger-Teton: South/southwest 8 to 10 mph. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah, Arizona strip: Upslope/upvalley 5 to 10 mph.
<b>Southern California</b> Areas of morning low clouds and fog coastal areas. Sunny in the valleys. Partly cloudy with isolated to widely scattered thundershowers southern mountains and deserts and the Sierra crest.	80 to 90 mountains. 90 to 100 valleys. 95 to 105 upper deserts. 105 to 110 lower deserts.	10 to 20% central California 20 to 30% southern California.	Southeast to southwest 5 to 15 mph.
<b>Alaska</b> Partly cloudy with isolated showers and thunderstorms in the afternoon.	70s to low 80's.	20 to 35%.	Northwest to northeast 5 to 15 mph.

## WILDLAND/URBAN INTERFACE WATCHOUTS

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.

● Consider the "Wildland/Urban Interface Watchouts" in completing a risk analysis for the urban interface area to be protected. Remember there are three categories of structures:

- Those that are not threatened.
- Those that are threatened.
- Those that have already been lost or too dangerous to protect.

● Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or "chimneys" on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.
- Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of 25+ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.

● continued...

- The need to evacuate the public, livestock, pets, and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
- Propane and above ground fuel tanks that are next to wooden structures or close to vegetation
- Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
- Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
- Airtanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
