

Incident Management Situation Report
Wednesday, September 10, 2025 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (101 Fires)
New large incidents:	4
Large fires contained:	1
Uncontained large fires:	52
CIMTs committed:	19
NIMOs committed:	0

Nationally, there are 14 fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Fourteen fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

On September 8, a contract firefighter with the U.S. Forest Service suffered a medical emergency on the Dragon Bravo in Arizona and passed away. The firefighting community expresses its condolences to the family and friends of the deceased.

Six US Army HH-60 MEDEVAC Helicopters from the 1st Air Cavalry Brigade (Fort Hood, TX) have been deployed to California to support wildland fire operations nationally.

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

The very slow-moving Pacific low will meander around Northern California and southern Oregon on Wednesday. Temperatures will remain cool across much of the West with increasing relative humidity. Widely scattered showers and thunderstorms will likely be ongoing in the early morning from northwest Nevada into southern Oregon and over southern Washington, with storms increasing later in the day. New initial attack is possible. By the afternoon and evening, scattered thunderstorms will occur from Northern California and Oregon east across the northern half of the Great Basin, and the Northern and Central Rockies to New Mexico. Most storms will be wetter, but the convective nature of the storms will still make heavier wetting rains more localized. Thunderstorms are expected to be isolated and drier in Washington, northern Idaho and Montana. Isolated thunderstorms will likely continue overnight Wednesday in parts of Oregon, the northern Great Basin and Montana. Drier conditions and strong winds are expected to extend from Southern California across the eastern two thirds of the Great Basin and western Colorado creating locally elevated conditions. Many of these areas have seen precipitation in the last week that will mitigate concerns, but new initial attack is possible.

In the Plains to the northern Great Lakes, morning showers and thunderstorms may be ongoing and will weaken through the day before redeveloping by the evening. Temperatures will continue to warm along and east of the Divide into the Plains and Mississippi Valley. In the Eastern US, scattered showers and thunderstorms will continue in Florida, near the Gulf Coast, and along the Eastern Seaboard. Drier air will continue across the rest of the East with RH 25–35%. Above normal temperatures will continue east of the Divide, in the Plains and Mississippi Valley and continue warming in the Southeast and Tennessee Valley. For Hawai'i, weakening Tropical Storm Kiko will continue passing north of the Islands with clouds and scattered showers continuing.
