

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY OCTOBER 2, 1994 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity remained low throughout the U.S. Large fire activity continued to decline, with minimal acreage increases. Demobilization has began as fires meet containment targets. Resource mobilization through NICC has moderated.

Northern Rockies Area Large Fires:

SIAM, Clearwater NF. A Type II Incident Management Team (Kechter) is assigned. Fire activity decreased due to cooler temperatures and moderate humidities. Lines were held on the south and west flanks. The east flank is under confinement strategy and line construction continues on the north side. Trails in the vicinity of the fire remain closed.

LIBBY COMPLEX, Kootenai NF. A Type II Incident Management Team (Bosworth) is assigned. The complex consists of the CHINA BASIN, MCKAY MOUNTAIN and STUDEBAKER fires. The complex received rain showers yesterday.

CABINET COMPLEX, Kootenai NF. A Type II Incident Management Team (Spradlin) is assigned. The active fires in this complex are the ROBERTS, SMITH PEAK and LOST GIRL. Fire behavior remained low due to lower temperatures and higher humidities. The fire received a few light showers. Line was completed using fireline explosives on Smith Peak. Mop-up is progressing well on Roberts. The fuel break and sprinkler system is half way completed on the Lost Girl.

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. The fire received brief, scattered showers. Higher humidities coupled with the showers, slowed the rate of spread. Structure protection plan is in place as a precautionary measure. Acreage increase is due to back firing towards the road at Lake Koocanusa.

ROBINSON, Yellowstone NP. A Type II Incident Management Team (Hancock) is assigned. Low cloud cover interfered with the effective use of helicopters. Inclement weather will accelerate demobilization.

Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. The fire remained inactive. Rain was received on the fire last evening. Crews continued to construct line and mop-up in Divisions S, J and F. Gusty northwest winds are forecast for today.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Fire activity remained low due to cooler temperatures and higher humidities. Fire activity was limited to creeping and occasional torching.

CHICKEN COMPLEX, Payette NF. Infrared photos from the last couple of days reflected a 200 acre increase. Light rain was received over the fire last evening. Fire activity consisted of occasional torching, smoldering in heavy fuels and creeping on the surface.

North Zone - California Large Fires:

SPECIMEN, Klamath NF. A Type II Incident Management Team (Phenix) is assigned. High humidities continued to keep fire activity low. Line construction has been completed. A burnout operation is planned for today in the east-northeast division, weather permitting. Four small fires are being staffed by Specimen fire personnel. Acreage increase is due to remapping. Demobilization is in progress.

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. Johnsons team continues to transition with another Type I Incident Management Team (Liebersbach). The team is coordinating the activities of all participating agencies in providing for the needs of the flood victims, assessing damages, contracting and administering repair contracts. Emergency flood recovery tasks in Alatna are complete. Recovery operations in Hughes are nearly complete, with demobilization under way. Recovery operations in Allakaket are progressing, with the remote location and impending onset of winter being major complicating factors.

Outlook: *** A RED FLAG WATCH has been posted for strong winds and drier conditions in Washington. *** An upper level low pressure system over southern British Columbia will move into western Montana this afternoon. Surface low pressure with a dry, cold front extending from eastern Montana to Portland, Oregon will slowly move south throughout the day. Strong winds and lower humidities are behind the cold front in Washington, prompting the red flag watch. A warm front extending south from the surface low to western Kansas will trigger showers and/or thunderstorms along the front range with spotty snow in the higher elevations. Fire activity on large fires is expected to remain minimal. The potential for increased activity exists in Washington, due to red flag conditions. Demobilization is expected to increase.
