

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, SEPTEMBER 5, 1999 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and minimal in most other areas. Large fire activity continued in the Northern California and Southern California Areas. The National Interagency Coordination Center mobilized infrared aircraft, telecommunications equipment and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, California, Utah, Nevada, Arizona, South Dakota, Indiana, Alabama, Kentucky, Tennessee and Texas.

NORTHERN CALIFORNIA LARGE FIRES

MHRD COMPLEX, Plumas National Forest. A Type I Incident Management Team (Giachino) is assigned. The uncontained fires in the complex continued to be active in yesterday's burning period. The threats to structures continue in the State Highway 70 corridor north of the Buck's fire.

HIGH COMPLEX, Shasta-Trinity National Forest. A Type I Incident Management Team (Foster) is assigned. Unified Command with California Department of Forestry (Young) is in effect. This complex consists of 19 lightning fires 22 miles north of Redding, CA. Weather and fire behavior continue to be unsuitable for burnout operations. A fireline explosives construction crew is making progress on the firelines.

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type II Incident Management Team (Bacon) is assigned. This complex is 28 miles northwest of Weaverville, CA. The complex consists of five lightning fires, the Onion (5,458 acres), Fawn (2,930 acres), Soldier/Megram (375 acres) and Dee's (1 acre). The Fawn fire has bumped Fawn ridge on the south flank. Fireline has been redirected south of the fire to a ridge south of Barrons Creek.

SOUTHERN CALIFORNIA LARGE FIRES:

BRIDGE, Angeles National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is located on Highway 39 north of the city of Azusa, CA. Strategy and tactics have changed to direct attack due to high relative humidity and lower temperatures.

BDF = San Bernardino National Forest.

SOUTHERN AREA LARGE FIRES:

BLACKSMITH, Great Smoky Mountains NP. This lightning ignited wildland fire is being managed to accomplish resource objectives. Dry, windy weather this past week has increased growth. Fire behavior is being assessed with short and intermediate term predictions. This will be the last report unless significant activity occurs.

969 COMPLEX, Texas State. This fire is near Bastrop, TX. This complex consists of three fires. Current threats include a warehouse and mobile home park.

OUTLOOK:

Dry high pressure has developed over most of the western U.S., returning temperatures and relative humidities to normal or trending that way. The exceptions are along the Canadian border. A weak upper level trough will spread high clouds over Montana, northern Oregon and Washington, where a cold front will provide partly sunny skies with a chance of rain and showers. Weak monsoonal moisture will again return to southeast Arizona and parts of New Mexico for a chance of thunderstorms.

Texas, Alabama, Florida and Kentucky will have a weak cold front move slowly from the Missouri valley to the Ohio valley with little effect other than partly sunny skies. High temperatures will remain in the 90's across most of the southeast. Florida and Kentucky will be dry. Southern Texas to Alabama will see scattered to widely scattered thunderstorms. Low relative humidities will continue with ranges of 30 to 40 percent common across the southeast.
