

INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, NOVEMBER 18, 1999 - 0800 MST  
NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Fire activity continues to intensify in the Southern Area as warm, dry and windy conditions prevail. Due to the fire activity in the South, Bennett's Type I Incident Management Team is being staged in the area to quickly respond to a new fire. The Rocky Mountain Area also reported a new large fire and was busy with initial attack activity as a strong cold front moved through last night, bringing high winds and mostly dry thunderstorms. The Eastern Area experienced moderate initial attack fire activity and reported one new large fire. The National Interagency Coordination Center mobilized helicopters, large transport aircraft, infrared aircraft, telecommunications equipment, crews, a Type I Incident Management Team and miscellaneous overhead. Studebaker's Type I Incident Management Team is being mobilized to Atlanta, Georgia for FEMA in anticipation of assistance to areas affected by Hurricane Lenny. Very high to extreme fire indices were reported in California, Utah, Wyoming, Colorado, Kansas, Nebraska, North Dakota, South Dakota, Indiana, Missouri, Wisconsin, Arkansas, Georgia, Mississippi and Oklahoma.

SOUTHERN AREA LARGE FIRES:

BLOOD COMPLEX, Chattahoochee National Forest. A Type I Incident Management Team (Melton) is assigned. These fires are burning in the Blood Mountain and Rich Wilderness areas near Blairsville, Georgia. No report was received on this fire.

BOOTENS GAP, Shenandoah National Park. A Type I Incident Management Team (Carvalho) is assigned. This fire is ten miles east of Shenandoah, Virginia. No report was received on this fire.

STANLEY CREEK, Chattahoochee National Forest. This fire is burning in heavy fuels and steep terrain near Blue Ridge, Georgia. The situation has improved and mop-up is continuing.

BUZZARD CREEK, Daniel Boone National Forest. This fire is nine miles northeast of Whitley City, Kentucky. A hotshot crew assisted in burnout operations yesterday. The expected containment has been delayed until today.

AVEY COMPLEX, National Forests in North Carolina. A Type II Incident Management Team (Kearney) is assigned. This complex consists of the Avey Creek, Goldie Deaden, Pine Ridge, Horse Cove, Maple Springs and Sweet Water fires. The fires are burning five to eight miles from Robbinsville, North Carolina. Crews made good progress building and holding firelines on all of the fires. The Avey Creek and Horse Cove fires have burned together and made significant acreage gains yesterday. The Goldie Deaden fire also gained significant acreage.

ROBINSON COMPLEX, Buffalo National River, National Park Service. A Type II Incident Management Team (Bollman) is assigned. This is a complex of

several arson starts, which have burned into several large fires 25 miles southeast of Harrison, Arkansas. High winds, low humidities and poor access are hampering control efforts. The forecast calls for high winds and low humidities to continue for the next few days.

CREEK ABC, National Forests in Alabama. This complex consists of nine fires. No other information was reported.

ALABAMA ABC, National Forests in Alabama. This complex consists of six fires, four miles south of Duncanville, Alabama. The fires range from one to 100 acres.

FORT LEWIS MOUNTAIN, Virginia Department of Forestry. This fire is five miles north of Salem, Virginia. Crews reestablished firelines that were lost Tuesday night. Approximately 95% of those lines were burned out. Reenforcement of the firelines will continue today.

DOG SLAUGHTER RIDGE 99, Virginia Department of Forestry. This fire is seven miles northeast of Shenandoah, Virginia. No new information was reported on this fire which was last reported at 500 acres. This will be the last report, unless new information is received.

ROCKY MOUNTAIN AREA LARGE FIRES:

MIDDLE DERBY, White River National Forest. A Type II Incident Management Team (Hartman) is assigned. This fire is burning in grass and timber, 25 miles northwest of Eagle, Colorado in the Flat Top Wilderness. Access is limited, with a three-mile hike to the fire from the end of the road. Safety concerns include falling snags and high winds gusting to 50 MPH. As a result, no personnel were assigned to the fireline yesterday.

OUTLOOK:

\*\*\* A FIRE WEATHER WATCH IS POSTED FOR LOW HUMIDITIES AND MODERATE SOUTHERLY WINDS IN MISSOURI, AND FOR LOW HUMIDITIES IN KENTUCKY. \*\*\*

Missouri will be sunny and warmer with high temperatures in the 70's. Relative humidity will range from 25-35 percent, with south winds at 15-30 MPH.

Kentucky will be partly sunny and warm with high temperatures in the mid 60's in the east and mid 70's in the west. Relative humidity will be 25 percent in the east and 25-35 percent in the west. Winds will be south to southwest at 10-20 MPH.

Georgia and North Carolina will be sunny with high temperatures ranging from 55 to 70 degrees. Relative humidity will be 25-35 percent, with light winds at 5-10 MPH.

Virginia will be mostly sunny with high temperatures in the mid 60's to lower 70's. Relative humidity will be 25-35 percent, with southwest winds at 10-20 MPH.

Colorado will be partly cloudy with widely scattered showers in the west and snow showers in the mountains. High temperatures will be in the 40's and 50's, with 30's and 40's in the mountains. Strong westerly winds will likely develop in areas east of the Continental Divide. Winds could gust to 70 MPH in the higher terrain of the front range and to 60 MPH on the adjacent high plains after sunrise.

Southern California will be sunny with high temperatures in the 50's in the mountains and 60's in valleys. Relative humidity will be 10-20 percent with southwest winds in the mountains at 5-15 MPH and northeast winds at 5-15 MPH in the valleys.
