

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JULY 9, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Two new large fires were reported, one each in Louisiana and Utah. Four large fires were contained, one each in Colorado, Louisiana, Utah, and Washington. Initial attack activity was heavy in the Northwest and Rocky Mountain Areas, moderate in Northern California, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Montana, New Mexico, Oregon, Utah, and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

FISHERMAN COMPLEX, Bridger-Teton National Forest. A Type 1 Incident Management Team (Hart) is assigned. This lightning caused complex, comprised of the Fisherman Creek and Buck Creek fires, is near Bondurant, WY. Containment efforts are focused on the east perimeter of the Buck Creek fire and the west perimeter of the Fisherman Creek fire.

GREYS RIVER COMPLEX, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This lightning caused complex, comprised of the Deer, Fawn, Murphy Creek, and Blind Bull fires, is 14 miles southeast of Alpine, WY. Large concentrations of fuel continue to burn out in the interior as the fires continue to creep and smolder along the perimeter. Light precipitation and higher relative humidity are assisting containment efforts.

SUPERNATURAL COMPLEX, Zion National Park. This lightning caused complex, comprised of the Wynonpits, Little Wyno, and Crazy Quilt fires, is 14 miles northeast of Hurricane, UT. The fires are burning on isolated mesas where a confinement strategy will be utilized.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	\$\$\$ LOSS	C-T-D

RID = Richfield Field Office, BLM

ROCKY MOUNTAIN AREA LARGE FIRES:

THE GAP, Rock Springs District, BLM. This lightning caused fire is burning in juniper, sagebrush, and grass 35 miles south of Rock Springs, CO. Little fire activity was observed due to high relative humidity, cloud cover, and light winds. KELLOG, Craig District, BLM. This lightning caused fire is 12 miles northwest of Meeker, CO within the Black Mountain

Wilderness Study Area. Assigned resources have begun mopup of the perimeter.

OUTLOOK:

Monsoonal moisture over the Great Basin will bring partly cloudy skies with scattered showers and thundershowers. High temperatures will be in the 70's and 80's in the mountains and 90 to 100 in the valleys. Minimum relative humidity will range from 15 to 30 percent, and winds will be southwest to west at 5 to 15 mph.

Colorado and Wyoming will have monsoonal moisture over the area, bringing partly cloudy skies with scattered showers and thundershowers. High temperatures will be in the 70's and 80's in the mountains and 90 to 100 in the valleys. Minimum relative humidity will range from 20 to 40 percent, and winds will be variable at 5 to 15 mph.

A dry southwest flow over the Northwest with some monsoonal moisture on

the east side of the Cascade Range, will bring mostly sunny skies. Isolated thunderstorms are expected over eastern Oregon and in southeast Washington. High temperatures will be 65 to 75 along the coast and in the 80's to near 100 inland. Minimum relative humidity will range from 5 to 15 percent on the east side of the Cascade Range. Winds will be southwest to northwest at 5 to 15 mph.

California will have drier air moving into the state, bringing mostly sunny skies. Some monsoonal moisture will remain in the state with scattered thundershowers in the south and central Sierra Nevada Mountains, and isolated thundershowers in the northeastern and southern mountain areas. High temperatures will be in the 60's and 70's along the coast, in the 80's and 90's inland and 100 to 110 in the deserts. Minimum relative humidity will range from 15 to 30 percent inland, and winds will be southeast to southwest at 5 to 15 mph.
