

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 22, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5

CURRENT SITUATION:

Initial attack activity was heavy in the Northern Rockies Areas and light elsewhere. Nationally, 239 new fires were reported. Eight new large fires were reported, three in the Southern Area, two in the Northern Rockies and Northwest Areas and one in the Rocky Mountain Area. Six large fires were contained, three in the Southern Area, two in the Northwest Area and one in the Northern Rockies Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Minnesota, Montana, Nevada, North Dakota, Oklahoma, Oregon, South Dakota, Washington and Wyoming.

An interagency training cadre and military crew advisors travel to Ft. Hood, TX today to begin training the U.S. Army's 2nd Battalion, 82nd Field Artillery Regiment. Task Force Steel Dragon will be commanded by LTC Gregory Shultz. The Task Force will be deployed to the Fish Creek fire, Lolo National Forest, in Western Montana.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Greenhoe) is assigned to manage Black Mountain 2, Beaver Lake, Fish Creek, Cherry Creek, Mile Post 59, Sapp, Slim's and Clear/Nez. An Area Command Team (Rounsaville) is assigned to manage Lincoln Complex, Winslow, East, Rough Draw, Cathedral Peak, Burnt Ridge, and Sheep Complex. An Area Command Team (Mann) is assigned to manage Crazy Horse, Robert, Wedge Canyon, Trapper Creek Complex and Little Salmon Creek Complex. An Area Command Team (Ribar) is assigned to manage Boles Meadow, Mineral/Primm, Cooney Ridge, Strawberry Complex, and Gold 1.

FISH CREEK, Lolo National Forest. A Type 2 Incident Management Team (Benes) is assigned. This incident is comprised of the Fish Creek, Thompson Creek, Surveyor Creek, Lower Quartz, Siamese Lake, Indian Creek, Middle Fork Indian Creek, Cedar Log and West Fork Indian Creek fires, 24 miles west of Missoula, MT. Moderate fire spread was observed along fire perimeters. Fire behavior was active on the Cedar Log fire. Structure protection is in place for 195 residences and one commercial property.

BEAVER LAKE COMPLEX, Clearwater National Forest. A Type 1 Incident Management Team (Frye) is assigned. This incident, comprised of the Beaver Lake, Siah Lake, Moose Lake, Lily Lakes, North Howard and Hopeful 2 fires, is 19 miles southwest of Missoula, MT. Fire behavior increased due to lower humidity levels and an increase in wind speeds. Moderate to significant perimeter growth was experienced on uncontained and unstaffed fires. Single and group torching, short sustained crown runs and spotting were observed. Structure protection is in place for 25 residences and 24 commercial properties.

SAPP, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in timber and grass, 45 miles east of Riggins, ID. Active ground fire was observed. Burn out operations were begun along the Whitewater Ranch Road. Structure protection is in place for 15 residences and two commercial properties.

BLACK MOUNTAIN 2, Southwestern Land Office, Montana Department of Natural Resources & Conservation. A Type 1 Incident Management Team (Gelobter) is assigned. This fire is in mixed

conifer, understory and grass, nine miles west of Missoula, MT. Fire activity was low with creeping and localized group tree torching. Firefighters worked on tying in the southwest corner of the fire. Structure protection is in place for 650 residences.

CHERRY CREEK COMPLEX, Lolo National Forest. A Type 2 Incident Management Team (Dietrich) is assigned. This fire, comprised of the Cherry Creek and Tepee Creek fires, is in lodge pole pine and heavy fuel loading, 12 miles southeast of Thompson Falls, MT. Firefighters continued to mopup hot spots. Structure protection is in place for 180 residences.

MILEPOST 59, Maggie Creek Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Beauchamp) is assigned. This fire is in brush, grass, mixed conifer timber and slash, five miles northwest of Kamiah, ID. No new information was reported.

SLIM'S COMPLEX, Nez Perce National Forest. A Type 2 Incident Management Team (Rios) is assigned. A Type 1 Incident Management Team (Sexton) will take over on August 23rd. This complex is comprised of the Slim's and Poet Branch fires, 35 miles east of Grangeville, ID. Fire activity increased on the Poet Branch fire, with major runs observed near the Poet campground. The Slim's fire is slowly advancing towards the wilderness.

CLEAR/NEZ COMPLEX, Clearwater National Forest. A Fire Use Management Team (Cones) is assigned. The complex is being managed to accomplish resource objectives. There are 20 fires in the complex. The proximal location is six miles southeast of Powell Junction, ID. Fire behavior was active due to the inversion lifting and lower humidity levels. Surface fire and torching were observed.

LINCOLN COMPLEX, Helena National Forest. A Type 1 Incident Management Team (Studebaker) is assigned. This complex is comprised of the Moose-Wasson and Snow-Talon fires, ten miles west of Lincoln, MT. Short crown runs and short range spotting were observed on the Moose-Wasson fire; group torching and short up slope runs were observed on the Snow-Talon fire. Evacuation orders remain in effect for residences north of Highway 200. Structure protection is in place for 150 residences and 20 commercial properties.

WINSLOW, Central Land Office, Montana Department of Natural Resources & Conservation. A Type 2 Incident Management Team (Blume) is assigned. This fire is in timber, five miles southwest of Lakeview, MT. Fire behavior moderated due to a persistent cloud cover which kept temperatures down and humidity levels up. Creeping and isolated torching were observed. Structure protection is in place for 30 residences and one commercial property.

EAST COMPLEX, Yellowstone National Park. A Type 2 Incident Management Team (Gardner) is assigned. This incident, consisting of the East and Grizzly fires, is ten miles east of Fishing Bridge Junction, WY. Crowning and active torching were observed. Firefighters made good progress with hazard tree cutting and cleanup of the East Yellowstone access road. Structure protection is in place for 12 residences and 27 commercial properties.

ROUGH DRAW COMPLEX, Gallatin National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This complex, five miles southeast of Livingston, MT, is composed of the Rough Draw, Slippery Rock, Speculator 1, Speculator 2, Elbow, Brundage and Hawley fires. All fires exhibited minimal fire activity. The evacuation order for the 63 Ranch north of the Rough Draw fire was lifted. Structure protection is in place for 18 residences and one commercial property.

CATHEDRAL PEAK, Custer National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is in timber, 10 miles south of Nye, MT. Cloud cover and higher humidity levels

resulted in limited fire activity. Structure protection is in place for 50 residences and one commercial property.

BURNT RIDGE SHEEP CAMP COMPLEX, Lewis and Clark National Forest. A Type 2 Incident Management Team (Hendricks) is assigned. This complex, four miles northwest of Neihart, MT, consists of the Burnt Ridge, Ant Park, Sheep Camp and Pioneer Ridge fires. Some torching was observed on the Ant Park fire; all other fires exhibited surface and creeping fire. The Sheep Camp fire was added to this complex; it was formerly part of the Sheep Complex.

SHEEP COMPLEX, Helena National Forest. This incident is in grass and timber, 28 miles southeast of Townsend, MT. This incident consists of the Sheep Camp, Hidden Valley and Big Avalanche fires. The Sheep Camp fire was removed from this complex and has become a part of the Burnt Ridge Sheep Camp Complex.

CRAZY HORSE, Flathead National Forest. A Type 1 Incident Management Team (Vail) is assigned. This fire is in mixed conifer with heavy dead and down fuels, ten miles northeast of Saint Ignatius, MT. Fire behavior was active with torching, flare-ups and short range spotting. Structure protection is in place for 225 residences and 15 commercial properties.

ROBERT, Flathead National Forest. A Type 1 Incident Management Team (Ferguson) is assigned. This fire is in timber, eight miles north of Columbia Falls, MT. Fire behavior was low with creeping and isolated torching. The majority of residences within the Blankenship Road area are now considered secure. The Avalanche Campground and Fish Creek camp remain closed. Structure protection is in place for 140 residences and six commercial properties.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Hart) is assigned. This fire is in sub-alpine fir with down fuels, 20 miles east of Eureka, MT. A smoke inversion limited all air operations. Short crown runs and interior torching were observed. Structure protection is in place for 80 residences.

TRAPPER CREEK COMPLEX, Glacier National Park. Two Type 1 Incident Management Teams (Ferguson and Hart) are sharing management responsibility for this complex. The complex, comprised of the Trapper Creek, Wolf Gun, Paul Bunyan and Trout fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. The fires remained in monitor status with no significant perimeter growth. Structure protection is in place for three commercial properties.

LITTLE SALMON CREEK COMPLEX, Flathead National Forest. A Fire Use Management Team (Weldon) is assigned. The complex is being managed to accomplish resource objectives. There are 20 fires in the complex. Fire runs, torching and crowning were observed on the Mid fire. Due to increased fire activity and multiple new starts, the trail closure in the fire area was extended southward to the head waters of the South Fork of the Flathead River. Structure protection is in place for six residences.

COONEY RIDGE, Southwestern Land Office, Montana Department of Natural Resources & Conservation. A Type 2 Incident Management team (Sandman) is assigned. This fire is in timber eleven miles east of Florence, MT. Group torching, short range spotting and short crown runs were observed. Swartz Creek residences remain evacuated. Structure protection is in place for 100 residences.

GOLD 1, Bitterroot National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is in heavy timber, nine miles northeast of Corvallis, MT. Fire activity was extreme with high rates of spread, crowning and spotting up to 0.25 miles. Structure protection is in place for six residences.

BOLES MEADOW, Southwestern Land Office, Montana Department of Natural Resources & Conservation. A Type 2 Incident Management Team (Hoff) is assigned. This fire is in mixed conifer stands and brush, 25 miles northeast of Missoula, MT. Fire behavior was active with torching, short crowning runs and short range spotting. Spot fires and slopovers from burnout operations were contained. Structure protection is in place for 150 residences.

MINERAL/PRIMM, Southwestern Land Office, Montana Department of Natural Resources & Conservation. A Type 1 Incident Management Team (Bennett) is assigned. The fire is in timber, 19 miles northeast of Missoula, MT. The fire continued to flank and back across the midslopes of Sunflower Peak in the southeast corner. Torching and crowning were observed in conifer stands. Burnouts on the southwest, northeast and southeast flanks successfully improved and secured lines. Structure protection is in place for 300 residences.

STRAWBERRY COMPLEX, Lolo National Forest. A Type 2 Incident Management Team (Berndt) is assigned. This incident, comprised of the Strawberry, Slide Rock, Brewster Creek, and Edelman fires, is in logging slash, 27 miles southeast of Missoula, MT. Fire behavior was low to moderate.

HOBBLE, Southern Land Office, Montana Department of Natural Resources & Conservation. A Type 2 Incident Management Team (Larsen) is assigned. This fire is in timber and grass, six miles east of Greycliff, MT. Fire behavior was limited to smoldering and creeping. The Stephens Hill Road was reopened and all evacuations have been lifted.

CRAIG II, Northern Cheyenne Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Stam) is assigned. This fire is in timber, grass and old slash, ten miles west of Lame Deer, MT. Fire behavior was limited to several small interior areas that exhibited active flaming and torching. Structure protection is in place for 35 residences.

EASTERN MONTANA COMPLEX, Miles City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Walker) is assigned. This incident, comprised of the Swain, Buffalo Creek and Willey fires, is in timber and grass, 45 miles south of Miles City, MT. Minimal interior burning was observed on the Willey and Swain fires. Eight coal seam fires were discovered on the Buffalo Creek fire.

WINDMILL COMPLEX, Crow Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Szczepanik) is assigned. The complex is comprised of the Windmill, Aspen, Old Bear and Little Hawk fires. This incident is in ponderosa pine, sagebrush and rangelands, 17 miles east of Hardin, MT. Fire activity escalated due to hot, dry and windy weather. A one acre slopover was contained. Structure protection is in place for 50 residences.

TYSON, Yellowstone National Park. This fire is in timber, 50 miles west of Cody, WY. Fire activity was low. Fire activity was low with single tree torching and spotting.

UNION, Yellowstone National Park. This fire is in timber, 35 miles west of Ashton, ID. The fire is burning slowly to the northeast. Single tree torching and some spotting were observed.

MIDDLE FORK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Ferguson) is assigned. This fire is in timber, five miles east of West Glacier, MT. There are three fires in this incident. This complex was previously reported as the Belton-Center-Harrison fire. Ground fire in heavy fuels and isolated torching were observed.

BETA LAKE – DORIS RIDGE, Flathead National Forest. A Type 1 Incident Management Team (Ferguson) is assigned. These fires are in timber, five miles south of Hungry Horse, MT. The fires

are in close proximity to the Hungry Horse Dam, recreational and communication facilities and powerlines. Fire behavior was limited to ground fire and isolated torching.

BALL CREEK, Flathead National Forest. This fire is in timber, ten miles east of Big Fork, MT. Short crown runs and short range spotting were observed.

BLACKFOOT LAKE, Flathead National Forest. This fire is in timber, 15 miles southeast of Hungry Horse. Short runs, torching and crowning were observed. The Jewel Basin Recreation Area was closed.

EASTERN GREAT BASIN AREA LARGE FIRES:

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This incident, comprised of the Marble and North Fork Lick fires, is in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. The fires are being managed in a confine/contain strategy. Group torching, short runs and backing were observed. The North Fork Lick fire is in monitor status; containment efforts are focused on the Marble fire. Structure protection is in place for 123 residences and two commercial properties.

CANYON CREEK, Boise National Forest. A transfer of command from Martin's Type 1 Incident Management Team to a Type 3 organization will take place on 8/23. This fire is in pine, sub-alpine fir, grass and brush, 20 miles northeast of Lowman, ID. Creeping and smoldering were observed.

SOUTH FORK, Boise National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is in ponderosa pine and mixed conifer, 25 miles northeast of Cascade, ID. Group torching and short crown runs with short range spotting associated with active backing fire on the northwest flank were observed. Area roads remain closed to the public. Structure protection is in place for two commercial properties.

WITHINGTON, Salmon-Challis National Forest. A Type 2 Incident Management Team (Muir) is assigned. This fire is in timber, grass and brush, seven miles south of Salmon, ID. Minimal fire activity was observed. Structure protection is in place for 4 residences.

RICHARDSON, Payette National Forest. This fire is in timber, ten miles east of Dixie. Group tree torching, spotting and crown runs were observed. Structure protection for one residence is in place.

FALCONBERRY, Salmon-Challis National Forest. This fire is in grass and mixed conifer with dead and down fuels, 25 miles northwest of Challis, ID. Moderate fire activity and spread were observed. The fire is in monitor status and structure protection will remain in place for one residence.

MOSS RIDGE, Bridger-Teton National Forest. This lightning-caused Wildland Fires Use (WFU) incident is being managed to accomplish resource objectives. Torching and spotting were observed in heavy timber. This will be the last narrative report unless significant activity occurs.

BOBCAT, Bridger-Teton National Forest. This lightning-caused Wildland Fires Use (WFU) incident is being managed to accomplish resource objectives. Active fire with torching and spotting was observed in heavy timber, ten miles north of Moran, WY. This will be the last narrative report unless significant activity occurs.

CLEAR CREEK, Bridger-Teton National Forest. A transfer of command from Cook's Fire Use Management Team back to the Bridger-Teton National Forest will take place on today. This lightning-caused Wildland Fire Use (WFU) incident, which began on 8/4, is being managed to accomplish resource objectives. The fire is in spruce and fir timber, 20 miles northeast of Pinedale, WY. Creeping and smoldering with isolated torching were observed. This will be the last narrative report unless significant activity occurs.

LOST PACKER COMPLEX, Salmon-Challis National Forest. This complex, comprised of the Waugh, Upper West Horse, Little Horse and Horse fires, is 36 miles northwest of Salmon, ID. No further information was reported.

NORTHWEST AREA LARGE FIRES:

B&B COMPLEX, Deschutes National Forest. A Type 1 Incident Management Team (Anderson) is assigned. This complex, comprised of the Booth and Bear Butte fires, is 14 miles west of Sisters, OR. The fires are in timber with heavy ground fuels. Plume dominated fire behavior with long range spotting was observed on both fires. The community of Camp Sherman was evacuated and structure protection is in place for 1,000 residences and 200 commercial properties.

TOGO MOUNTAIN, Colville National Forest. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This fire is in timber, three miles east of Danville, WA. Active fire with isolated torching was observed. Structure protection is in place for 61 Canadian residences.

LIGHTNING COMPLEX, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This complex is comprised of the Grouse Creek, Hass Ridge and Two Corral fires, 31 miles east of Joseph, OR. Significant up hill runs and torching were observed. Structure protection is in place for three residences.

WILCOX, Okanogan/Wenatchee National Forest. A Type 2 Incident Management Team has been ordered. This fire is in timber, brush and grass, 15 miles northeast of Tonasket, WA. Extreme fire behavior with crowning, torching and running was observed. One residence has been evacuated. Structure protection is in place for 30 residences and five commercial properties.

BIRCH CREEK RIM, Vale District, Bureau of Land Management. This fire is in sagebrush and grass, 28 miles northwest of Jordan Valley, OR. A wind-driven fire with moderate activity in light fuels was observed. Structure protection is in place for one residence.

ROOSTER COMB, Vale District, Bureau of Land Management. This fire is in sagebrush and grass, 25 miles northwest of Jordan Valley, OR. A wind-driven fire with moderate activity in light fuels was observed.

HAZEL MOUNTAIN, Wallowa-Whitman National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is in grass, brush and sub-alpine fir, 16 miles southwest of Enterprise, OR. Smoldering fire with occasional torching was observed. This fire is in monitor status. No new information was reported.

NOCA COMPLEX, North Cascades National Park. This lightning-caused Wildland Fire Use complex, which began on 8/5, is comprised of seven fires, eleven miles southeast of Newhalem, WA. Creeping surface fire with low to moderate rates of spread in sub-alpine fir was observed. No new information was reported.

ROCKY MOUNTAIN AREA LARGE FIRES:

BOULDER BASIN 2, Shoshone National Forest. A Type 2 Incident Management Team has been ordered. This fire is in grass, sagebrush and timber, 37 miles southwest of Cody, WY. Plume dominated fire with group torching and spotting was observed. Structure protection is in place for 25 residences and 20 commercial properties.

BLACKWATER, Shoshone National Forest. This fire is in timber with heavy ground fuels, 30 miles west of Cody, WY. Fire activity diminished from yesterday. Some torching and short runs were observed. Structure protection is in place for ten residences and two commercial properties.

NORTH BIGHORN COMPLEX, Bighorn National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This complex, comprised of the Little Horn 2 and Riley Point fires, is 35 miles northwest of Sheridan, WY. Creeping and smoldering were observed throughout the complex. Structure protection remains in place for 19 evacuated summer homes and one Game and Fish cabin on the Little Horn 2 fire.

WEST CHIMNEY ROCK, Rawlins Field Office (South Zone), Bureau of Land Management. This fire is in ponderosa pine, lumber pine, sagebrush and mountain shrubs and 34 miles northeast of Rawlins, WY. Creeping fire with isolated torching was observed. Structure protection is in place for twelve residences and one commercial property.

SAWTOOTH, Routt National Forest. This fire is in blow-down and bug-killed spruce, 20 miles northeast of Steamboat Springs, CO. Smoldering in heavy fuels with single and group tree torching was observed.

NORRIS, Shoshone National Forest. This fire is 35 miles west of Cody, WY. A sizeable increase in acreage is due to a cold front that passed over the fire area yesterday. The fire is currently un-staffed.

OKS = Oklahoma Division of Forestry

OUTLOOK:

Red Flag Warnings: Montana west of the divide for dry and wet thunderstorms and gusty winds

Fire Weather Watches: West central Montana west of the divide, all Montana east of the divide, and western North Dakota for dry and wet thunderstorms and gusty winds.

Weather Discussion: A low pressure area off the coast of California will rotate inland today, increasing moisture and instability across Oregon and Idaho. The moisture and instability will eventually make its way into western Montana this evening and overnight. As storms begin, some of them may be on the dry side and accompanied by strong winds, especially across Montana. The wettest storms are expected in Oregon and over the central mountains of Idaho. Conditions will remain warm and unstable across Wyoming as well, with isolated thunderstorm activity in the afternoon. Northern California and the northern Great Basin should also see thunderstorms today, before drying out on Saturday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHERN ROCKIES AREA Scattered dry and wet thunderstorms with gusty winds.	Idaho: 80 to mid 90s Montana: 80s North Dakota: 80s	Idaho: 15 to 25% Montana: 15 to 30% North Dakota: 30 to 40%	Idaho: Southwest 5 to 15 mph Montana: Southeast to southwest 10 to 20 mph North Dakota: Southeast 10 to 20 mph
EASTERN GREAT BASIN Idaho, Bridger-Teton: Breezy and a little cooler with scattered showers and thunderstorms. Local heavy rain and much improved humidity. Utah, Arizona Strip: Scattered showers and thunderstorms. Breezy over western Utah.	Idaho, Bridger-Teton: 65 to 75 mountains, 75 to 85 valleys. Utah and Arizona Strip: 68 to 83 higher elevations, 83 to 98 valleys.	Idaho, Bridger-Teton: 22 to 35% valleys, 30 to 47% mountains. Utah, Arizona Strip: 14 to 30% valleys, 22 to 40% mountains.	Idaho, Bridger-Teton: Southwest 10 to 20 mph with strong gusty winds near storms. Utah, Arizona Strip: Southwest 10 to 20 mph western Utah, variable or southwest 5 to 15 mph elsewhere.
NORTHWEST AREA Showers and wet thunderstorms scattered across much of the region.	Cooler lots of 60s and 70s, still in the 80s in parts of southwest Oregon and lower elevations east of the Cascades.	Higher, mostly 35 to 55%. Driest in eastern Washington 20 to 35%.	Variable to mostly west 6 to 12 mph.
Rocky Mountain Area Becoming partly cloudy with isolated to scattered thunderstorms. A few storms could be dry over northern Wyoming and western South Dakota.	Upper 80s to mid 90s lower elevations, Mid 70s to mid 80s in the mountains.	14 to 18% Western Slope of Colorado and south central and northeast Wyoming. 18 to 28% elsewhere.	South to southeast 10 to 25 mph on the eastern plains and Black Hills region. Southwest winds 10 to 20 mph northwest Wyoming. Variable 5 to 15 mph elsewhere.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys, otherwise partly to mostly sunny with isolated afternoon thunderstorms over the southern California mountains and deserts east and south of Cajon Pass.	65 to 80 coastal areas. 80 to 95 mountains. 85 to 100 valleys. 85 to 100 upper desert. 95 to 110 low desert.	15 to 30% desert. 15 to 30% mountains. 20 to 35% valleys. 50 to 65% coast.	Southwest 10 to 20 mph with higher gusts in the afternoon.

<p>EASTERN AREA Partly cloudy and breezy over northern Michigan and northeast Wisconsin</p>	<p>75 to 82 across the northern Great Lakes</p>	<p>35 to 45% across inland areas of the upper peninsula of Michigan and northeast Wisconsin</p>	<p>North to northwest winds at 10 to 20 mph, decreasing late in the afternoon</p>
<p>NORTHERN CALIFORNIA AREA Decreasing cloudiness from the south during the day. Scattered showers and a few thunderstorms in the morning all areas, then mostly in the north in the afternoon.</p>	<p>Mostly mid 70s to upper 80s. Near the coast 60s to lower 70s.</p>	<p>Mostly 23 to 45%.</p>	<p>Mainly southeast to southwest 5 to 15 mph, with erratic downdraft gusts 25 to 40 mph under or near thunderstorms</p>
<p>SOUTHWEST AREA Partly cloudy. Scattered thunderstorms, most numerous New Mexico</p>	<p>70 to 80 mountains, around 80 to near 108 lower elevations.</p>	<p>15 to 20% Arizona New Mexico, 20 to 30% elsewhere.</p>	<p>Variable to upslope 5 to 15 mph, except east to southeast 10 to 20 mph across New Mexico and Texas.</p>
<p>WESTERN GREAT BASIN AREA Partly to mostly cloudy with scattered wet thunderstorms.</p>	<p>80s to mid 90s in the lower elevations, mid 70s to mid 80s in upper elevations.</p>	<p>10 to 20% north, 20 to 35% south & Sierra's.</p>	<p>Southwest 15 to 25 mph in the northern 2/3 of Nevada and south 5 to 15 mph across the far southern end of the state.</p>

BUILDING FIRELINE DOWNHILL WITH FIRE BELOW

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and downslope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.
- To reduce the risks:
 - If the answer is “no” to any of these questions, consider other tactics and provide for safety first.
 - Never compromise escape routes to safety zones for the sake of building line. Remind everyone that a situation check is each and every firefighter’s right and responsibility.
