

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, MARCH 12, 2004 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and light elsewhere, with 1,745 new fires reported for the week. Very high to extreme fire indices were reported in Arizona, Missouri and Georgia.

SOUTHERN AREA LARGE FIRES:

IMPASSABLE ONE, National Forests in Florida. This fire is in pocosin shrub and timber, 15 miles northeast of Lake City, FL. A Unified Command has been established between a Type 2 Incident Management Team (Prevey) and the Florida Division of Forestry (Koehler). Minimal to moderate fire activity was reported.

OKA GROOVE, Chickasaw Agency, Bureau of Indian Affairs. This fire is in grass and timber, two miles south of Oak Grove, OK. Moderate fire activity was observed.

JACK JUMPER, Oklahoma Division of Forestry. This fire is in timber, ten miles south-southeast of Stilwell, OK. Rapid rates of spread were observed in light fuels and downed oak timber.

OUTLOOK:

Weather Discussion: In the Southern Area, high pressure will be building over the area Friday and Saturday with low humidity over portions of Florida on Friday. A frontal system with rain over Texas on Friday will spread rain to areas east of the Mississippi River on Sunday with the system exiting off the coast Tuesday. This will bring another round of lower humidity and gusty winds to Florida on Tuesday and Wednesday. In southern California, a strong ridge of high pressure will persist through next Thursday. However, Santa Ana winds are expected Saturday night and Sunday morning. In the Southwest, a disturbance will move through the area Friday and Saturday followed by a high pressure ridge Sunday through Thursday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA AREA Mostly sunny.	68 to 78 coastal areas. 65 to 80 mountains. 78 to 88 valleys. 70 to 80 upper deserts. 80 to 92 low deserts.	12 to 25%.	Northeast 8 to 15 mph.

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)

- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."

- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training

- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.

- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.

- Discuss using SAFENET to monitor safety issues other firefighters may be having.
