

**INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY MAY 31, 2004 – 0800 MDT
 NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 93 new fires reported. One large fire was contained in the Southern Area. Very high to extreme fire indices were reported in Arizona, Colorado, Florida, Nevada, New Mexico, Oklahoma and Texas.

SOUTHWEST AREA LARGE FIRES:

PEPPIN, Lincoln National Forest. A Type 2 Incident Management Team (Bateman) is assigned. This fire is six miles north of Capitan, NM in timber. Hazardous terrain, poor accessibility, and heavy dead fuel loading continue to be concerns. High winds and low relative humidity resulted in active fire behavior.

KP, Apache-Sitgreaves National Forest. A transfer of command from a Type 2 Incident Management Team (Kvale) to a Type 3 organization will occur today. This fire is 20 miles south of Alpine, AZ in brush and mixed conifer. Unburned fuel within the fire area is a major concern due to the high potential for reburn. Creeping surface fire and small group torching were observed. US Highway 191 will remain closed to public access in order to provide for firefighter and public safety.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
PEPPIN	NM	LNF	30,000	35	UNK	672	14	26	5	12	2.8M
KP	AZ	ASF	15,181	90	UNK	445	11	8	5	0	3M

SOUTHERN AREA LARGE FIRES:

ROAD 1, Florida Division of Forestry. A Florida Division of Forestry Type 2 Incident Management Team (Jones) is assigned. This fire is 17 miles northwest of Macclenny, FL in pine. No new information was reported. This will be the last report unless new information is received.

BOMBING RANGE 1, National Forests in Florida. This fire is 14 miles north-northwest of Umatilla, FL in brush and pine. This fire is within a Naval bombing range; no on the ground suppression action is allowed. A confinement strategy is in place. Minimal fire behavior was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

CORAPEAKE ROAD	VA	GDR	273	100	---	94	1	3	1	0	392K

GDR = Great Dismal Swamp National Wildlife Refuge

OUTLOOK:

Weather Discussion: High pressure will build over the West for warmer and drier weather. In Florida, high pressure will continue to produce dry weather over the area with increasing westerly winds over the northern and central portions of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHWEST AREA Mostly sunny.	60s to 70s mountains 80 to near 100 lower elevations	5 to 15%, except 15 to 20% highest mountains	West 10 to 15 mph in Arizona, northwest 15 to 25 mph in northern New Mexico.
SOUTHERN CALIFORNIA AREA Patchy morning low clouds and fog coastal areas, otherwise sunny.	70 to 80 coastal areas 75 to 90 mountains 85 to 95 valleys 85 to 95 upper deserts 100 to 110 lower deserts	8 to 20%	Southeast to southwest 5 to 15 mph.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
