

**INCIDENT MANAGEMENT SITUATION REPORT**  
**SATURDAY, JULY 17, 2004 – 0800 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was heavy in the Alaska Area, moderate in the Eastern Great Basin Area and light elsewhere. Nationally, 166 fires were reported. Three new large fires were reported in the Eastern Great Basin Area. Four large fires were contained, one each in the Southern California, Northern California, Rocky Mountain and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, New Mexico, Nevada, Oklahoma, Oregon, Texas, Utah and Washington.

**ALASKA AREA LARGE FIRES:**

**BOUNDARY**, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Hart) is assigned. This fire is 20 miles northeast of Fairbanks, AK in alpine tundra and black spruce. Extreme fire behavior with crowning was reported. Evacuations in Fairbanks Creek remain in effect.

**CENTRAL COMPLEX**, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Chrisman) is assigned. This complex, comprised of the Middle Birch Creek, Preacher Creek, Rock Creek, Crazy and Tokoma Bluffs fires, is 15 miles southwest of Circle, AK in spruce and hardwoods. Minimal fire behavior was observed.

**TAYLOR HIGHWAY COMPLEX**, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This complex, comprised of the Wall Street, Billy Creek, Gardiner Creek, Big Creek, Anomaly, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Frequent torching and occasional crowning runs were reported.

**WOLF CREEK**, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Backing fire behavior was observed.

**EVANSVILLE**, Tanana Zone, Bureau of Land Management. This fire is one-half mile southeast of Bettles, AK in black spruce. Fire activity was low with continued backing on the south flank reported.

**EAGLE COMPLEX**, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the American Summit, Edwards Creek, King Creek, Kandik River, Indian Grave Creek, Deer Creek and seven additional fires, is located three miles northeast of Eagle, AK in tundra, black spruce and mixed hardwoods. Precipitation slowed fire spread on the north side of the complex.

**LOWER MOUTH**, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. Moderate fire behavior with torching was reported.

SOLSTICE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Bird) is assigned; A Type 2 Incident Management Team has been ordered. This incident is 57 miles northwest of Fort Yukon, AK in black spruce, hardwoods and tundra. The complex consists of the Pingo, Winter Trail, Sucker River, Black Currant Lake, Vundik Lake, Boulder Creek and Sheenjek fires. Fire behavior was low to moderate.

YUKON CROSSING COMPLEX, Upper Yukon Zone, Bureau of Land Management. This complex includes the previously reported Waldron Creek and Fort Hamlin Hills fires. This complex is ten miles southwest of Stevens Village, AK in spruce, dwarf birch and tundra. Fire behavior was moderate with some torching observed.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northwest of Delta Junction, AK in tundra and spruce. Parts of the fire were very active.

**WESTERN GREAT BASIN AREA LARGE FIRES:**

WATERFALL, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Martin) is assigned. This fire is three miles west of Carson City, NV in timber with litter understory and brush. Extreme fire behavior was observed with torching and spotting up to one-quarter mile. Favorable weather conditions assisted crews in making progress on north side. Evacuations of subdivisions remain in effect.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
WATERFALL	NV	HTF	7,566	50	7/20	1901	37	123	14	46	2.5M

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

PINE, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Gelobter) and the Los Angeles County Fire Department (Hokanson). This fire is 14 miles southeast of Lebec, CA in heavy brush. Active fire behavior was reported. Local road closures as well as mandatory and voluntary evacuations remain in effect.

MEADOW, Yosemite National Park. A Fire Use Management Team (Cook) will assume command at 0700 PDT today. This lightning-caused Wildland Fire Use (WFU) incident, located seven miles southeast of Yosemite Village, CA in timber, is being managed to accomplish resource objectives. Backing fire with occasional torching was observed.

RRU = Riverside Unit, California Department of Forestry and Fire Protection (CDF)

### NORTHWEST AREA LARGE FIRES:

ICICLE, Okanogan/Wenatchee National Forest. A Type 1 Incident Management Team (Bennett) has been ordered. This fire is eight miles west of Leavenworth, WA in timber, litter and understory. Downhill backing, torching and spotting were reported. Evacuations are in effect in the Icicle Drainage and above Bridge Creek campground.

POT PEAK, Okanogan/Wenatchee National Forest. A Type 2 Washington State Interagency Incident Management Team (Johnson) is assigned. This fire is 15 miles northwest of Chelan, WA in timber. Minor torching and running were observed in unburned interior islands of fuel.

FREEZEOUT, Okanogan/Wenatchee National Forest. This fire is 65 miles northeast of Bellingham, WA in timber. Steep terrain is impeding containment efforts. This will be the last narrative report unless significant activity occurs.

### EASTERN GREAT BASIN AREA LARGE FIRES:

DOLLAR, Boise National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is 16 miles northeast of Cascade, ID in heavy dead and down fuels. Fire activity was moderate with short range upslope runs and spotting reported.

CABIN CREEK, Salmon Challis National Forest, A Type 2 Incident Management Team (Brunner) has been ordered. This fire is eight miles west of North Fork, ID, in timber, brush and grass. Crews were removed from the fireline this afternoon due to extreme fire behavior with three hundred foot flame lengths and one-quarter mile spotting.

TRAIL CANYON, Moab Field Office, Bureau of Land Management. This fire is 40 miles north of Green River, UT in Douglas fir, pinyon pine, juniper and aspen. Minimal fire activity was reported.

SHEEP FENCE, Cedar City Field Office, Bureau of Land Management. This fire is 30 miles southeast of Escalante, UT, in pinyon pine, juniper and sagebrush. Backing fire behavior was observed.

SINKS, South Central State, Utah State Division of Forestry. This fire is four miles northwest of Oak City, UT in brush and grass. The fire was wind-driven by thunderstorm downdrafts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DOLLAR	ID	BOF	626	5	7/24	376	12	0	4	0	NR

**SOUTHWEST AREA LARGE FIRES:**

NUTTALL COMPLEX, Coronado National Forest. A Type 2 Incident Management Team (Winchester) is assigned. This complex, located 15 miles southwest of Safford, AZ in brush and heavy timber, consists of the Clark, Nuttall and Gibson fires. Precipitation slowed fire spread.

WILLOW, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is six miles southwest of Payson, AZ in timber, grass and chaparral. Fire behavior was minimal due to precipitation.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

**ROCKY MOUNTAIN AREA LARGE FIRES:**

OIL SPRINGS, White River Field Office, Bureau of Land Management. A transfer of command from a Fire Use Management Team (Weldon) to a Fire Use Manager has occurred. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is 27 miles south of Rangely, CO in pinyon pine, juniper, sagebrush and grass. Minimal fire behavior due to light precipitation and higher relative humidity was reported. This will be the last report unless significant activity occurs.

## OUTLOOK:

**Weather Discussion:** The weather pattern continues to show high pressure centered over the West with an upper low off the coast. The southerly flow between these two features will bring scattered thunderstorms into northern California, Oregon, Washington, Idaho and western Montana. Moisture also covers much of the rest of the interior West, including the southern California mountains and deserts. High pressure over Alaska is gradually shifting east and weakening.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>ALASKA AREA</b> Partly to mostly cloudy. Isolated thunderstorms or showers. Areas of thick smoke in the east.	68 to 83.	30 to 45%.	Southwest at 10 mph.
<b>WESTERN GREAT BASIN AREA</b> Partly cloudy in the northwest with isolated dry thunderstorms, cloudy elsewhere with isolated to scattered wet thunderstorms.	North Valleys: 85 to 97. South Valleys: 90 to 100. Mountains: 70 to 85.	West Valleys: 10 to 20%. East Valleys: 15 to 30%. Mountains: 20 to 33%.	Northwest: South at 10 to 15 mph with gusts to 25 mph. Elsewhere: Southwest at 5 to 15 mph
<b>EASTERN GREAT BASIN</b> <b>Idaho, Bridger-Teton:</b> Partly cloudy with widely scattered to scattered wet and dry thunderstorms. <b>Utah, Arizona Strip:</b> Partly cloudy with scattered wet thunderstorms lower elevations, widespread wet thunderstorms higher elevations.	<b>Idaho, Bridger-Teton:</b> 69 to 85 mountains. 85 to 99 valleys. <b>Utah and Arizona Strip:</b> 76 to 92 mountains. 85 to 104 valleys.	<b>Idaho, Bridger-Teton:</b> 25 to 35% mountains. 17 to 30% valleys. <b>Utah, Arizona Strip:</b> 28 to 50% mountains. 17 to 30% valleys.	<b>Idaho, Bridger-Teton:</b> South to southwest 5 to 10 mph Idaho. Mainly upslope/upvalley 4 to 8 mph western Wyoming. <b>Utah, Arizona Strip:</b> Mainly upslope/upvalley 5 to 12 mph northern Utah. Southwest to south 8 to 15 mph central/southern Utah and Arizona Strip.
<b>NORTHWEST AREA</b> Partly cloudy west of the Cascades. Scattered thunderstorms likely east side heading from Oregon toward Washington.	70s and 80s western Washington. 90s southwest Oregon.  Eastside: 85 to 95.	West of Cascades: 25 to 40%.  Elsewhere 15 to 25%. 10% driest valleys.	Generally light winds 5 to 10 mph except stronger gusts possible near thunderstorms.
<b>ROCKY MOUNTAIN AREA</b> Scattered showers and afternoon thunderstorms over Colorado.	Highs in 80s and lower 90s. 70s mountains.	15 to 22% for Wyoming, Black Hills and extreme southwest Colorado.	Variable at 5 to 15 mph.
<b>NORTHERN ROCKIES AREA</b> Isolated thunderstorms over the western half Montana and Idaho. Sunny in North Dakota.	95 to 105 Idaho. 80s North Dakota. 75 to 85 in higher terrain.	12 to 22% in Idaho. 45 to 55% North Dakota.	West – Slope/valley 5 to 10 mph. East – East winds 5 to 15 mph.
<b>NORTHERN CALIFORNIA AREA</b> Chance of showers and thunderstorms except North Coast.	Mid 80s to mid 90s inland. 60s to mid 70s coast.	5 to 15% driest inland areas.	South to west southwest 5 to 15 mph with gusts 22 to 32 mph higher exposed terrain north and eastern areas.

## FALLING SNAGS

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from falling snags:
  - Strong winds
  - Night operations
  - Steep slopes
  - Diseased or bug-killed areas
- Things to consider when assessing the potential hazards of both snags and green trees:
  - Trees have been burning for an extended period.
  - High-risk tree species (those that are known for rot and shallow root systems) are in the area.
  - Numerous downed trees
  - Dead or broken tips and limbs overhead
  - Accumulation of downed limbs
  - Absence of needles, bark or limbs
  - Leaning or hung-up trees
- Mitigation measures to take:
  - Identify and flag all high-risk snags and green trees.
  - Keep personnel out of the high-risk areas until the hazard has been removed.
  - Establish lookouts.
