

**INCIDENT MANAGEMENT SITUATION REPORT  
TUESDAY, JULY 27, 2004 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Alaska Area and light elsewhere. Nationally, 256 fires were reported. Five new large fires were reported, two in the Western Great Basin, one each in the Eastern Great Basin, Northern Rockies and Southern Areas. Two large fires were contained, one each in the Northern California and the Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Minnesota, Montana, Nevada, Oregon, Washington and Wyoming.

**ALASKA AREA LARGE FIRES:**

**BOUNDARY**, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Anderson) is assigned. This fire is 20 miles northeast of Fairbanks, AK in black spruce and tundra. Fire behavior over most of the area was characterized by smoldering and creeping.

**TAYLOR HIGHWAY COMPLEX**, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Bateman) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Big Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Creeping, smoldering and scattered individual tree torching were reported over the entire complex.

**CENTRAL COMPLEX**, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Middle Birch Creek, Preacher Creek, Rock Creek, Crazy, Bolgen Creek, Big Bluff, Takoma Bluff and a portion of the Wolf Creek fires, is 15 miles southwest of Circle, AK in spruce and hardwoods. Some creeping with occasional group torching was reported. Structure protection remains in place in the communities of Central and Circle Hot Springs.

**WOLF CREEK**, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Minimal fire activity with smoldering and creeping was reported. Structure protection remains in place.

**CAMP CREEK**, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northeast of Delta Junction, AK in tundra and spruce. Individual torching with smoldering and creeping was reported.

**PINGO**, Upper Yukon Zone, Bureau of Land Management. This fire is five miles north of the village of Venetie, AK in black spruce, hardwoods and tundra. Moderate fire behavior was observed.

**LOWER MOUTH**, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. No new information was reported. This will be the last report unless new information is received.

**AGGIE 2**, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is 25 miles north of Fox, AK in spruce and hardwoods. Single and group tree torching was observed.

### WESTERN GREAT BASIN AREA LARGE FIRES:

ROBBERS, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Sexton) has been ordered. This fire is 26 miles northwest of Las Vegas, NV in timber and brush. Extreme fire behavior with rapid spread was reported. State Highways 157 and 158 are closed. Spring Mountain Youth Camp, Camp Stimpson, and Hilltop Campground have been evacuated.

PATTERSON, Ely Field Office, Bureau of Land Management. This lightning-caused Wildland Fire Use (WFU) incident, located 44 miles south of Ely, NV in pinyon, juniper, sage and grass, is being managed to accomplish resource objectives. Isolated tree torching and wind-driven runs were observed.

### NORTHWEST AREA LARGE FIRES:

LOG SPRINGS, Warm Springs Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (West) has been ordered. This fire is 21 miles north/northwest of Warm Springs, OR in timber and heavy downed fuels. Group torching, backing and running fire behavior was observed. State Highway 9 has been closed. Structure protection is in place for the community of Simnasho.

LAUDERDALE, Washington State Department of Natural Resources – Southeast. A Washington Interagency Management Team (Berndt/Andring) is assigned. This fire is five miles east/southeast of Cle Elum, WA in ponderosa pine, sagebrush and grass. Fire behavior was moderate. Evacuations in the communities of Elk Springs and Green Canyon remain in effect.

POT PEAK COMPLEX, Okanogan/Wenatchee National Forest. A Type 1 Interagency Incident Management Team (Lohrey) is assigned. This complex, comprised of the Pot Peak, Deep Harbor, Pyramid and the previously reported SiSi Ridge fires, is 15 miles northwest of Chelan, WA in timber, litter and understory. The Pot Peak fire reported moderate fire behavior. SiSi Ridge fire was backing slowly towards Cabin Creek. The Deep Harbor fire reported active fire behavior, with growth in all directions.

DOWNEY CREEK WFU, Mt. Baker-Snoqualmie National Forest. This lightning-caused Wildland Fire Use (WFU) incident, 16 miles north/northeast of Darrington, WA in the Glacier Peak Wilderness is being managed to accomplish resource objectives. Trail #768 has been closed.

### EASTERN GREAT BASIN AREA LARGE FIRES:

DOG VALLEY HILL, South Central State, Utah State Division of Forestry. This fire is four miles west of Nephi, UT in pinyon pine, juniper, sage and grass. Crowning, running and some torching was observed.

JONES, Dixie National Forest. This fire is five miles northwest of Toquerville, UT in timber and brush. Thunderstorms influenced fire behavior with torching and spotting. Local road closures are in effect. Oak Grove campground remains closed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

MEADOW COMPLEX, Yosemite National Park. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located four miles southeast of Yosemite Valley, CA in timber, is being managed to accomplish resource objectives and consists of the Meadow, Jay, River, and several other small fires. The Meadow fire reported minimal spread and moderate fire behavior. Other fires in the complex reported smoldering and intermittent creeping fire behavior with no appreciable growth. Trail closures remain in effect.

MEADOW COMPLEX – WFU	CA	YNP	4,634	N/A	N/A	135	2	0	1	0	1.6M

### EASTERN AREA LARGE FIRES:

SECTION 33 WFU, Voyageurs National Park. A Fire Use Management Team (Hall) has been ordered. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles southeast of International Falls, MN in balsam, spruce and pine, is being managed to accomplish resource objectives. Short runs and frequent torching were observed.

### NORTHERN ROCKIES AREA

MIDDLE BEALL, Craig Mountain Area Office, Idaho Department of Lands. This fire is four miles northeast of Lapwai, ID in grass, brush and crops. No further information was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
MIDDLE BEALL	ID	CMS	600	80	UNK	29	1	7	2	0	NR

### SOUTHWEST AREA LARGE FIRES:

TRANSFER WFU, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located five miles east of Tusayan, AZ in timber and grass, is being managed to accomplish resource objectives. Light precipitation over the fire area resulted in minimal activity.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TRANSFER - WFU	AZ	KNF	230	N/A	N/A	6	0	2	0	0	5K

### SOUTHERN AREA LARGE FIRES:

VASTAR, McFaddin National Wildlife Refuge. This fire is 17 miles southwest of Sabine Pass, TX in tall grass. Eight to ten foot flame lengths and spotting were reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SBR = Sabine National Wildlife Refuge

## OUTLOOK:

**Weather Discussion:** A mainly dry cold front will continue to press across the Northern Rockies today, keeping winds high from central Washington through northern Montana. Some thunderstorm activity is also expected from north-central Montana southward through the Rocky Mountain and Southwest Areas. Conditions will remain quite dry south of the front in Oregon and California. Ahead of the cold front, windy and dry conditions will also spread over much of northern Minnesota, raising fire danger significantly today. In Alaska, one more day of high wind is expected on north slopes of the Alaska Range.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>ALASKA AREA</b> <b>Central and Eastern Interior:</b> Partly to mostly cloudy. Locally windy through about mid day.	<b>Central &amp; Eastern Interior:</b> Mostly mid-60s to mid-70s.	<b>Central &amp; Eastern Interior:</b> 28 to 45%.	<b>Central &amp; Eastern Interior:</b> South to Southeast 10 to 25 mph in the morning and decreasing in the afternoon.
<b>NORTHWEST AREA</b> Sunny.	80s to low 90s.	<b>West of Cascades:</b> 25 to 35% north. 15 to 25% south. <b>East of Cascades:</b> 10 to 20%.	Northwest 7 to 15 mph except north to 20 to 25 on the south Oregon coastal sections.
<b>NORTHERN CALIFORNIA AREA</b> Night and morning coastal fog and low clouds. Clear elsewhere.	60s to 70s coast. 80s to 90s inland. 100 to 103 valleys.	7 to 15% east of the Cascade-Sierra crest. 12 to 20% other inland areas. 50% coastal areas.	Southwest to northwest 4 to 10 mph with higher afternoon gusts.
<b>EASTERN GREAT BASIN AREA</b> <b>Idaho, Bridger-Teton:</b> Mostly sunny with isolated thunderstorms in eastern Idaho and western Wyoming. <b>Utah, Arizona Strip:</b> Partly cloudy with isolated thunderstorms lower elevations. Scattered thunderstorms mountains.	<b>Idaho, Bridger-Teton:</b> 63 to 85 mountains. 85 to 95 valleys. <b>Utah and Arizona Strip:</b> 69 to 85 mountains. 85 to 103 valleys. 103 to 110 Lake Mead.	<b>Idaho, Bridger-Teton:</b> 20 to 35% mountains. 11 to 26% valleys. <b>Utah, Arizona Strip:</b> 20 to 36% mountains. 13 to 25% valleys.	<b>Idaho, Bridger-Teton:</b> West to northwest 5 to 12 mph except 10 to 20 mph upper Snake River Plain. <b>Utah, Arizona Strip:</b> West to southwest 5 to 15 mph.
<b>SOUTHERN CALIFORNIA AREA</b> Areas of morning low clouds and fog coastal areas, otherwise mostly sunny.	75 to 85 coastal areas. 85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 105 to 115 lower deserts.	10 to 20% valleys. 8 to 15% mountains. 8 to 15% deserts.	Southwest to northwest 10 to 20 mph.
<b>EASTERN AREA</b> Mostly sunny, warm and breezy across northern Minnesota.	82 to 87.	31 to 36%.	South to southwest winds 14 to 24 mph; occasional higher gusts up to 30 mph.
<b>ROCKY MOUNTAIN AREA</b> Scattered afternoon thunderstorms across much of the Rocky Mountain Area.	70s to 80s. 60s to 70s mountains.	15 to 20% southwest Wyoming. 25 to 35% elsewhere.	Southerly 10 to 20 mph over the eastern plains; otherwise variable 5 to 15 mph .

<p><b>NORTHERN ROCKIES AREA</b> Partly cloudy and cooler with isolated afternoon thunderstorms over southwest and southern Montana.</p>	<p>75 to 85.</p>	<p>18 to 28% west of the Continental Divide. 40 to 50% in North Dakota.</p>	<p>West to northwest 5 to 15 mph behind front. South to southwest 10 to 20 mph ahead of front. Wind gusts near 30 mph vicinity of the front.</p>
<p><b>WESTERN GREAT BASIN AREA</b> Isolated thunderstorms east, some may be dry. Sunny west.</p>	<p>90 to 100 north valleys. 95 to 105 south valleys. 75 to 95 mountains.</p>	<p>5 to 12% south. 6 to 15% north. 12 to 28% mountains.</p>	<p>North: West to northwest at 10 mph with gusts to 25 mph. South: Southwest to west at 10 mph with gusts to 25 mph.</p>

### **WILDLAND/URBAN INTERFACE WATCHOUTS**

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.

● Consider the “Wildland/Urban Interface Watchouts” in completing a risk analysis for the urban interface area to be protected. Remember there are three categories of structures:

- Those that are not threatened.
- Those that are threatened.
- Those that have already been lost or are too dangerous to protect.

● Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or “chimneys” on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.
- Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of 25+ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.

● Continued...

- The need to evacuate the public, livestock, pets and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
- Propane and above ground fuel tanks that are next to wooden structures or close to vegetation
- Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
- Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
- Air tanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
