## OUTLOOK:

**Weather Discussion:** The storm system moving through the Rockies today will bring gusty winds to the Southwest. In Alaska, a disturbance tracking across the state will bring moisture to portions of the interior and southern coastal areas.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Southwest</b> Partly cloudy to mostly sunny. Breezy to windy much of NM...near Red Flag conditions southern into south-central NM. Isolated thunderstorms west TX.	50s to 60s mountains. Mid 70s to low 90s lower elevation areas.	8 to 15% parts extreme western AZ, NM into southwest TX, 25 to 35%+ mountains including west TX.	SW 15 to 25 mph and gusty central and southern NM, and into far west TX. SW to W 10 to 20 mph most other areas, S to SE 10 to 20 mph in parts of west TX.
<b>Southern California</b> Mostly sunny.	60 to 75 mountains. 70 to 80 valleys. 70 to 80 upper deserts. 90 to 100 lower deserts.	15 to 30%.	Northwest 5 to 15 mph.

### **RETARDANT DROP SAFETY**

Having retardant dropped on a fire should be a routine event. However, there are risks associated with retardant drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location of lead planes and airtankers during retardant drop operations.
- Be sure you have positive contact with the lead plane or airtanker before the drop.
- Personnel can be injured by the impact of retardant drops. Clear personnel out of the target area when the drop is conducted. If an individual is unable to retreat to a safe place, the best method for minimizing injury from the drop is to:
  - Hold your handtool away from your body.
  - Lie face down with hardhat in place and head toward the oncoming aircraft.
  - Grasp something firm to prevent being carried or rolled about by the retardant.
  - Do not run unless escape is ensured.
  - Get clear of dead snags and tops.
  - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation.
