

**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY, JULY 1, 2005 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 92 fires reported. Eight new large fires were reported, three in the Southwest Area, two in Eastern Great Basin Area, one in the Alaska Area, and two in the Southern Area. Four large fires were contained, one each in the Southwest and Eastern Great Basin Areas, and two in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Minnesota, New Mexico, Nevada, Oregon, Texas and Washington.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

CAVE CREEK COMPLEX, Tonto National Forest. A Type 1 Incident Management Team (Whitney) is assigned to manage the South Zone. Another Type 1 Incident Management Team (Oltrogge) is assigned to manage the North Zone. This complex, comprised of the Lousy, Broad and Cave Creek fires is six miles northeast of Carefree, AZ in chaparral. The communities of Black Canyon City, Camp Verde, Pine and Strawberry, the Agua Fria National Monument, endangered species habitat, archeological resources and high voltage power lines remain threatened. Structure protection is in place and burn out operations are scheduled for the west portion of the South Zone. The fire spotted over the New River, and both Zones reported very active fire behavior.

SAND TANK, Phoenix Field Office, Bureau of Land Management. This fire is five miles southwest of Gila Bend, AZ in grass. The fire is located on a Department of Defense range containing unexploded ordnance, making suppression actions difficult. Burn out operations have been implemented. Running fire was reported.

HOME, Phoenix Field Office, Bureau of Land Management. This fire is 15 miles southeast of Gila Bend, AZ in grass. The fire is located on a Department of Defense bombing range containing live munitions, which is preventing access to the area. Extreme fire runs were reported.

SNAKE RIDGE, Apache-Sitgreaves National Forest. This fire is 12 miles northeast of Clifton, AZ in grass. Steep terrain and limited access are impeding containment efforts. No new information was reported.

WEST ESTRELLA, Pima Agency, Bureau of Indian Affairs. This fire is five miles southwest of Laveen, AZ in mesquite, brush and grass. Evacuations and road closures have been lifted. Interior flare-ups were observed.

GHOST, Tonto National Forest. This fire is five miles north of Apache Junction, AZ in grass and brush. No new information was reported.

MATUCK, Truxton Canon Agency, Bureau of Indian Affairs. This fire is 25 miles northeast of Peach Springs, AZ in pinyon, juniper, grass and yucca. No new information was reported.

DRAGON COMPLEX, Grand Canyon National Park. A Fire Use Management Team (Clark) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is 10 miles north of Grand Canyon Village, AZ in ponderosa pine, aspen and dead and down fuel. The complex is being managed to accomplish multiple resource objectives. One trail has been closed. Low intensity backing and flanking fire was reported.

MUDERSBACH, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident is burning 13 miles southwest of Tusayan, AZ in ponderosa pine, pinyon and juniper. The fire is being managed to accomplish resource objectives. This will be the last narrative report unless significant activity occurs.

### EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

TWEEDY POINT, Arizona Strip Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Thomas) will assume command today. This fire is 32 miles south of St. George, UT in grass, pinyon, juniper and sage. Desert Tortoise habitat remains threatened. The fire's remote location is making access difficult. Successful burn out operations halted advance on the western portion of the fire.

DIAMOND COMPLEX, Cedar City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) is assigned. This complex, comprised of the Diamond Valley, Wide Canyon, Jarvis Peak, Hollow Wash, and Plateau fires, is eight miles north of St. George, UT in grass, pinyon pine, juniper and brush. The domestic watershed for the St. George community, grazing allotments, Desert Tortoise habitat and wilderness areas are threatened. A light inversion and low winds have allowed crews to make good progress on line construction. The fire burned

actively on the Diamond Valley and Wide Canyon fires, gaining considerable acreage. The Plateau fire was contained, and the Jarvis Peak and Hollow Wash fires were controlled.

BUZZARD, Arizona Strip Field Office, Bureau of Land Management. This fire is 12 miles east of Fredonia, AZ in grass, pinyon pine, juniper and brush. Active fire behavior with running and crowning was observed.

BLUE SPRING, Dixie National Forest. A Type 2 Incident Management Team (Muir) is assigned. This fire is three miles north of Leeds, UT in grass, pinyon pine and oak brush. An evacuation order for local residences was lifted. Smoldering and isolated creeping were observed. The 298 Anders Junction fire was controlled.

MT. BANGS COMPLEX, Arizona Strip Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Blume) is assigned. This complex, comprised of the Lime Kiln, Elbow, Lead, Hatchet, Cedar Wash and Hancock fires, is 15 miles south of Mesquite, NV in grass and brush. Desert Tortoise habitat and wilderness values remain threatened. Fire behavior was minimal.

HARRISBURG CREEK, Dixie National Forest. This fire is four miles west of Leeds, UT in pinyon, juniper and brush. Road closures are in effect. Minimal fire behavior was reported.

### WESTERN GREAT BASIN INCIDENTS / LARGE FIRES:

FORK, Las Vegas Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Krugman) is assigned. This fire is 35 miles south of Mesquite, NV in grass, pinyon pine and juniper. Lake Mead National Recreation Area, mining claim improvements, Lime Canyon and Jumbo Springs Wilderness areas, Million Hills Wilderness Study Area, communication sites, and Desert Tortoise habitat remain threatened. Firing operations on the north end of the fire were successful. Active fire behavior with extreme rates of spread was reported.

SOUTHERN NEVADA COMPLEX, A Type 2 Incident Management Team (Suwyn) is assigned. This complex, comprised of the South Desert Complex, Mesquite Complex, Delmar and Mormon Fires is near Mesquite, NV in grass, pinyon and juniper. Structure protection for the town of Motoqua is in place. Wilderness areas, Caliente municipal watershed, and Desert Tortoise habitat remain threatened. The Meadow Valley fire is threatening Ella Mountain lookout and

communication sites. The fire is spreading into inaccessible terrain at higher elevations. Extreme rates of spread occurred.

GOOD SPRINGS, Las Vegas Field Office, Bureau of Land Management. This fire is 11 miles northwest of Jean, NV in juniper, brush and grass. No new information was reported. This will be the last report unless new information is received.

### ALASKA AREA INCIDENTS / LARGE FIRES:

KING COUNTY CREEK, Kenai-Kodiak Area Forestry. A Type 2 Incident Management Team (Doty) is assigned. This fire started on Fish and Wildlife Service land 13 miles southeast of Sterling, AK in black spruce, mixed hardwoods and dead and down beetle killed spruce. Residences and commercial property remain threatened. Favorable winds and increased relative humidity contributed to progress along the western flank. Crowning and torching were reported.

MISSION CREEK, Alaska Fire Service, Tanana Zone. This fire is five miles northeast of Tanana, AK in black spruce and hardwoods. The community of Tanana, native allotments with two structures and fish camps are threatened. Structure protection for cabins is in place. The fire's westward advance was halted by burn out operations. Extreme fire behavior and flashy fuels are hampering containment efforts.

LOST HORSE CREEK, State of Alaska, Fairbanks Area Forestry. This fire is 25 miles north of Fairbanks, AK in black spruce, mixed hardwoods and tundra. Residences along Wickersham Creek and a military site remain threatened. The fire is not road accessible. Successful burn out operations contributed to holding the western flank. Flame lengths up to 150 feet with extreme fire behavior were reported.

CHAPMAN CREEK, Alaska Fire Service, Northern Field Office. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. The community of Coldfoot remains threatened. Fire activity increased after the smoke inversion lifted.

LONG LAKE, Alaska Fire Service, Upper Yukon Zone. This fire started on Fish and Wildlife Service land 13 miles northwest of Beaver, AK in mixed hardwoods, black spruce and brush. The community of Beaver and Native corporate lands and allotments are threatened. Minimal fire behavior due to favorable weather conditions slowed fire growth. Smoldering, creeping, and interior torching were reported.

SHEENJEK RIVER, Alaska Fire Service, Upper Yukon Zone. This fire started on Fish and Wildlife Service land six miles northeast of Ft. Yukon, AK in birch, aspen, black and white spruce. Cabins and allotments remain threatened. Isolated crowning and torching with backing surface fire was observed.

## OUTLOOK:

**Weather Discussion:** Winds will increase over the northern Great Basin as a trough pushes into the Pacific Northwest. Otherwise, another hot, dry day is on tap for the Southwest as high pressure remains over the area. In Alaska, cooler weather with scattered showers will be the rule over much of the state as high pressure exits into Canada and a low pressure trough begins to move in from the Bering Sea.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b> Continued dry, warm with mostly sunny skies. Isolated to scattered thunderstorms northeast New Mexico and northwest Texas, isolated thunderstorms southwest Texas.	Mountains: 70 to 90s. Lower elevations: 90 to 110.	2 to 15%. Highest mountain areas: 15 to 25%. Northeastern New Mexico and northwest Texas: 25 to 40%.	Southwest to west 5 to 15 mph with gusts 20 to 25 mph Arizona. West to northwest 5 to 15 mph with some gusts in New Mexico. East to southeast 10 to 20 mph with higher gusts west Texas and eastern New Mexico.
<b>Western Great Basin</b> Sunny and hot, a few afternoon cumulus buildups across the mountains of central Nevada.	North valleys: 84 to 100. South valleys: 95 to 112. Mountains: 76 to 95.	North valleys: 8 to 23%. South valleys: 4 to 10%. Mountains: 5 to 25%.	Southwest to west 5 to 12 mph. Afternoon gusts 25 mph.
<b>Eastern Great Basin</b> Mostly sunny. Isolated afternoon mountain thunderstorms Idaho and central Utah.	Idaho, Bridger-Teton: Mountains 65 to 75, Valleys 82 to 93. Northern Utah: Valleys 84 to 96, Mountains 72 to 86. Southern Utah, Arizona Strip: Valleys 98 to 108, Mountains 75 to 95.	Idaho, Bridger-Teton: Mountains: 15 to 30%. Valleys: 14 to 24%. Northern Utah: Valleys: 10 to 20%. Mountains: 17 to 32%. Southern Utah, Arizona Strip: 4 to 14%.	Idaho, Bridger-Teton: West to southwest 5 to 15 mph. Gusty. Northern Utah: West 15 to 25 mph. Southern Utah, Arizona Strip: Southwest 10 to 20 mph.
<b>Southern California</b> Areas of morning low clouds and fog coastal areas, otherwise sunny.	Mountains: 80 to 95. Valleys: 90 to 102. Upper deserts: 95 to 102. Lower deserts: 110 to 118.	5 to 15%.	Southwest to northwest 5 to 15 mph.
<b>Rocky Mountain Area</b> Scattered afternoon thunderstorms eastern portions, with isolated dry lightning in the west.	Mid 80s to near 95. Mountains: 70s.	Lower elevations in the west: 10 to 20%. Elsewhere: 25 to 35%.	West: West 10 to 20 mph. East: South 10 to 20 mph.

## **SAFETY ZONES**

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
  - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
  
- How do you identify a good safety zone?
  - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
  - The best locations are usually “in the black;” those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
  - Size is sufficient for all present resources with a minimum distance from fire of at least four times the maximum flame length.
  - Location is scouted and marked well for visibility at all times.
  - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
