

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, October 25, 2006 - 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (49 new fires)

New large fires: 0 (*)

Large fires contained:

Uncontained large fires:

Area Command Teams:

Type 1 IMTs committed:

Type 2 IMTs committed:

Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Predictive Services Discussion

Gusty winds are on tap for northern California today, and over southern California Thursday and Friday. Southern California will see slightly lower humidity and increasing winds today. Gusty northeast winds and much lower humidity are expected Thursday and Friday. Northern California will see gusty north winds and lower humidity today. Winds will diminish Thursday with warm, dry weather continuing into Friday.

POWER LINE SAFETY

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Don't use right-of-ways as a jump or cargo drop spot.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
