

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, April 6, 2007 - 1000 MDT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (55 new fires)  
 New large fires: 1  
 Large fires contained: 2  
 Uncontained large fires: 1  
 Area Command Teams:  
 Type 1 IMTs committed:  
 Type 2 IMTs committed:  
 Fire Use Teams:

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

**Southern Area (PL 2)**

New fires: 50  
 New large fires: 1  
 Uncontained large fires: 0

**April Fools**, Florida Division of Forestry. Four miles south of South Bay, FL. Sawgrass. No new information reported. Last report unless new information is received.

MTF – Mark Twain NF

**Predictive Services Discussion:** Dry and breezy conditions will continue over the Southeast and portions of the Mid-Atlantic states into early next week. Winds will increase at times over southern California and the Southwest today through the weekend. Isolated thunderstorms may develop over northern Arizona Friday and Saturday.

### INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

- Use the following reporting factors for sizeup. Discuss others that may be used.
  - Fire name and location
  - Terrain (slope, aspect, elevation) and position of fire on the slope
  - Size of fire
  - Fuel type, anticipated control problems, and spread potential
  - Values threatened
  - Weather conditions (wind speed and direction)
  - Fire behavior
  - Resources on the fire and those needed
  - Estimated containment and control times
  - Cause (known, suspected, under investigation)
  
- After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.
  - Have you sized up the fire and relayed the information to dispatch?
  - Is the observed fire weather consistent with the forecast?
  - Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
  - Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
  - Are lookouts in place or can you see all of the fire area?
  - Can you communicate with everyone on the fire and with dispatch?
  - Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
  - Are safety and the standard fire orders being followed?
  - Do you have a complete list of what resources have been ordered for the fire?
  - Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
