

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, June 3, 2007 - 0800 MDT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (154 new fires)
New large fires:	2 (*)
Large fires contained:	3
Uncontained large fires:	15
Area Command Teams committed:	
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2
Fire Use Teams committed:	

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

**Southern Area (PL 5)**

New fires:	27
New large fires:	0
Uncontained large fires:	11
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

**Big Turnaround Complex**, Okefenokee NWR. IMT 1 (Ruggiero). Ten miles southeast of Waycross, GA. Southern rough and timber. Heavy rain fell over the fire area. Numerous structures, historic sites and recreation facilities remain threatened.

**Sweat Farm Road**, Georgia Forestry Commission. North Carolina IMT 2 (Hildreth). IMT also managing the Bugaboo Scrub 2 fire. Started on private land ten miles west of Waycross, GA. Southern rough and timber. Heavy rain from tropical depression Barry.

**BICY Complex** (four fires), Big Cypress National Preserve. IMT 1 (Whitney). Fifty-one miles west of Ft. Lauderdale, FL. Southern rough. Interior fire activity.

**Okeechobee Complex** (three fires), Florida DOF. Eight miles southwest of Okeechobee, FL. Tall grass. Interior fire activity. Scattered precipitation occurred. Residences remain threatened.

**Big Starr Complex** (thirteen fires), Cherokee NF. IMT 2 (Wilder). Seven miles southeast of Englewood, TN. Hardwood litter. Smoldering in heavy fuels. Increase in acreage is due to more accurate mapping. Residences threatened.

**Bugaboo Scrub 2**, Georgia Forestry Commission. Previously reported. Started on private land four miles east of Fargo, GA. Southern rough and timber. Heavy rain from tropical depression Barry.

**Deland Complex** (seven fires), Florida DOF. Six miles west of Ormond Beach. Southern rough. Activity fire behavior within interior swamp lands. Residences remain threatened.

**Dairy Road**, Florida DOF. Seven miles northwest of Keystone Heights, FL. Southern rough. Moderate fire behavior within the interior. Numerous structures threatened.

**Middle of Nowhere**, Florida DOF. Previously reported. Fifteen miles northeast of Ft. Myers, FL. Southern rough. Interior smoldering. Fire received precipitation.

**Kerry Tully**, Florida DOF. Eight miles east of Dade City, FL. Southern rough. Very minimal fire activity due to precipitation over the fire area.

**Buck Shank**, Great Smoky Mountains NP. Ten miles south of Maryville, TN. Hardwood litter. Creeping with isolated torching.

**Predictive Services Discussion:** Hot conditions will continue over much of the West today with thunderstorms, some dry, over northern California, Oregon and the Great Basin. Thunderstorms are expected to fewer in number than the previous couple of days. Isolated dry thunderstorms are also possible over the higher elevations of the northern and eastern Arizona, and western New Mexico. Interior Alaska will have scattered wet thunderstorms. Dry air will move into the Southeast following Tropical Depression Barry.

### **UNBURNED FUEL BETWEEN YOU AND THE FIRE**

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
  - Post lookouts
  - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
