

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 8, 2007 - 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (134 new fires)
New large fires:	0 (*)
Large fires contained:	2
Uncontained large fires:	11
Area Command Teams committed:	
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2
Fire Use Teams committed:	

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 4)

New fires:	79
New large fires:	0
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Big Turnaround Complex, Okefenokee NWR. IMT 1 (Ruggiero). Ten miles southeast of Waycross, GA. Southern rough and timber. Smoldering. Numerous structures, historic sites and recreation facilities remain threatened. Reduction in acreage due to more accurate mapping.

Sweat Farm Road, Georgia Forestry Commission. Georgia IMT 2 (Floyd). IMT also managing Bugaboo Scrub 2 fire. Started on private land 10 miles west of Waycross, GA. Southern rough and timber. Creeping and smoldering.

BICY Complex, Big Cypress National Preserve. Fifty-one miles west of Ft. Lauderdale, FL. Southern rough. No further information received.

Okeechobee Complex (three fires), Florida DOF. Eight miles southwest of Okeechobee, FL. Grass. Flanking fire and interior smoldering.

Dairy Road, Florida DOF. Seven miles northwest of Keystone Heights, FL. Southern rough. Smoldering in interior.

Deland Complex (seven fires), Florida DOF. Six miles west of Ormond Beach. Southern rough. Actively burning in swamps. Residences remain threatened.

Middle of Nowhere, Florida DOF. Fifteen miles northeast of Ft. Myers, FL. Southern rough. Minimal fire activity. Monitoring by aircraft.

Predictive Services Discussion: The Southwest will be warmer with less wind today followed by a chance of dry thunderstorms over eastern Arizona and western New Mexico this weekend. Interior Alaska will see scattered showers today with a drier weather over the weekend. Scattered showers will continue over most of Florida and the Southern Area through the weekend.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

HYDRATION

Studies conducted on wildland firefighters indicate that fire suppression activities generate about 7.5 kilocalories of heat each minute worked, or 450 kilocalories for each hour. Additional heat (about 180 kilocalories per hour) comes from the environment and the fire. The total heat load amounts to 580 kilocalories per hour (400 + 180 = 580). Complete evaporation of 1 liter of sweat removes 580 kilocalories of heat. In order to maintain a healthy body temperature, the firefighter needs to evaporate about 1 liter (slightly more than 1 quart) of sweat during each hour of work.

- Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.
- Before work you should take extra fluids to prepare for the heat. Drink 1 or 2 cups of water, juice, or a sport drink before work. Avoid excess caffeine; it hastens fluid loss in the urine.
- While working drink at least 1 quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Providing a portion of fluid replacement with a carbohydrate/electrolyte sport beverage will help you retain fluids and maintain energy and electrolyte levels.
- After work it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs, so you should drink more than you think you need.
- Rehydration is enhanced when fluids contain sodium and potassium, or when foods with these electrolytes are consumed along with the fluid.
- Unacclimatized workers lose more salt in the heat so they need to pay particular attention to salt replacement. Don't overdo salt intake; too much salt impairs temperature regulation. Excessive salt can cause stomach distress, fatigue, and other problems.
- Make potassium-rich foods like bananas and citrus fruits a regular part of your diet, and drink lots of lemonade, orange juice, or tomato juice.
- Limit the amount of caffeine drinks such as coffee and colas because caffeine increases fluid loss. Avoid alcoholic drinks. They also cause dehydration.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine, or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.
- Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; continuing to work in a dehydrated state can lead to serious consequences, including heat stroke, muscle breakdown, and kidney failure.
