

**Incident Management Situation Report
Saturday, July 1, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (95 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires: **	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	3

Nationally, there are six fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

Geographic Area Reports

Understanding the IMSR

Six incident management teams, 18 fire suppression crews, 60 smokejumpers and 27 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Total	26	99,713	50	135	25	2,454	277

Rocky Mountain Area (PL 2)

Fire Activity and Teams Assigned	Total
New fires:	5
New large incidents:	0
Uncontained large fires:	5
Complex IMT's Committed:	3

Titan, Las Animas County. CIMT (RM Team 1). Eleven miles northwest of Trinidad, CO. Timber. Moderate fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

Spring Creek, Garfield County. CIMT (RM Team 2). Four miles southwest of Parachute, CO. Brush, grass and timber. Minimal fire behavior with backing and creeping. Residences and energy infrastructure threatened. Area closures in effect.

Chris Mountain, San Juan NF, USFS. CIMT (RM Team 3). Six miles northwest of Pagosa Springs, CO. Timber and brush. Moderate fire behavior with single tree torching and short-range spotting. Structures threatened. Area, road and trail closures in effect.

Arkansas Loop, Southern Ute Agency, BIA. Twelve miles west of Tiffany, CO. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened.

Coal Mine, Archuleta County. Eighteen miles south of Pagosa Springs, CO. Timber and brush. Moderate fire behavior with smoldering, group torching and creeping. Residences threatened.

Southwest Area (PL 3)

Fire Activity and Teams Assigned	Total
New fires:	7
New large incidents:	1
Uncontained large fires:	4

* **West Main**, Central District, Arizona DOF. Seven miles northeast of Yuma, AZ. Brush. Active fire behavior with running, spotting and torching. Area and road closures in effect.

Diamond, Central District, Arizona DOF. One mile east of Scottsdale, AZ. Grass and brush. Minimal fire behavior with smoldering. Numerous structures threatened. Area and trail closures in effect.

Sunset North, Capitan District, New Mexico State Forestry. Thirty miles west of Roswell, NM. Grass and brush. Minimal fire behavior. Structures threatened.

Rico, Las Cruces Field Office, BLM. One mile north of Pinos Altos, NM. Light slash and timber. Minimal fire behavior.

Three Lakes, Kaibab NF, USFS. Previously reported incident. Five miles south of Jacob Lake, AZ. Grass and timber. Moderate fire behavior with backing and flanking. Structures threatened. Last narrative report unless significant activity occurs.

Acres (2013 – 2022 as of today)	1,928,479

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Above normal temperatures will continue in the ArkLaTex into the Ozarks, Lower/Mid-Mississippi Valley, and much of the Southeast. Scattered to Isolated thunderstorms are likely in parts of southwest Texas and into eastern New Mexico. Thermal troughing will extend from the Desert Southwest through the Central Valley, where temperatures may reach as high as 110°F, and into far southwest Oregon and parts of the Inland Northwest leading to hot, dry, and unstable conditions. Temperatures will also be above normal amid low relative humidity over much of the Great Basin and into western Colorado. Strong westerly winds overlapping areas of low relative humidity are possible in the southern California deserts, the eastern slopes of the Cascades into the Columbia Basin as well as over portions of north central Montana. Isolated to scattered mixed wet and dry thunderstorms may form over the mountains of central Idaho and western Wyoming, while wetter and more widespread thunderstorms are expected from the central Great Plains through, Mid-Mississippi Valley, and into the southern Appalachians, including severe thunderstorms. Isolated to scattered showers and thunderstorms are likely in parts of the Great Lakes into the Northeast and much of the Atlantic Coast.
