

**Incident Management Situation Report  
Thursday, May 11, 2023 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Total</b>
Initial attack activity:	Light (78 Fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
<a href="#">Complex IMTs</a> committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**[Geographic Area daily reports](#)**

**[Understanding the IMSR](#)**

**This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.**

**Active Incident Resource Summary**

**Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.**

**Predictive Services Discussion:**

Elevated to locally critical fire conditions are expected across parts of New Mexico into west Texas due to dry and breezy weather. Hot, dry, and unstable conditions will develop again across South Florida, with isolated to scattered thunderstorms expected in the afternoon across Florida. Much of the East Coast will continue to be dry, with critically low relative humidity in portions of New England again. Severe thunderstorms are likely on the Plains, and heavy rain is also likely on portions of the northern and central High Plains and in the Lower Mississippi Valley.
