

**Incident Management Situation Report
Thursday, May 18, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (107 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are two fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Thirteen fire suppression crews, three incident management teams and twenty-five overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

Acres (2013 – 2022 as of today)	886,667

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Very dry conditions will continue across the Northeast today with minimum relative humidity of 15-25% creating moderate significant fire potential. A cold front will move through the Great Lakes, northern and central Plains, and Front Range bringing scattered to widespread showers and thunderstorms with wetting rain. Isolated to scattered thunderstorms will develop across much of the Rockies and Southwest, while well above normal temperatures continue along the West Coast. Scattered thunderstorms will continue over the Southeast, including the Florida Peninsula, with the heaviest rain in the coastal Carolinas.
