

Incident Management Situation Report
Friday, December 22, 2023 – 0730 MDT
National Preparedness Level 1

National Fire Activity (December 15, 2023 – December 21, 2023):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (205 fires)
New large incidents:	4
Large fires contained:	2
Uncontained large fires: **	2
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average	Quantity
Fires (2013 – 2022 as of today)	58,387
Acres (2013 – 2022 as of today)	7,107,688

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A slow-moving storm will move from the Rockies today into the Plains this weekend then off the East Coast late next week with temperatures above normal for much of the US. Light to moderate precipitation will fall across the Rockies today and tomorrow, with snow in the mountains and a brief periods of dry downslope winds across the southern High Plains. Across much of the Plains to the Mississippi Valley precipitation will be moderate to heavy this weekend, with moderate snow possible on portions of the central and northern High Plains. Precipitation will be light to moderate across the eastern US from the Great Lakes and Appalachians to the East Coast and fall as rain, except across the higher peaks of the Adirondacks and northern New England. Another storm will affect the northwestern US mid to late next week with high snow levels, and heavy rain will fall across much of northwest Oregon into western Washington.
