

Evidence Gathering and Documentation

After completing this lesson, participants will be able to:

Describe the two reasons for collecting evidence.

Understand the three types of evidence (human, material, and environmental).

Document the accident site and site evidence using sketches, drawings, diagrams, maps, photos, and video.

Prepare a witness list, gather witness statements and conduct witness interviews.

Identify and collect organizational records pertaining to the accident.

Properly preserve, handle, catalog, and secure evidence.
