APPENDIX G-3

the Decision (Incident Requirements, Incident Objectives, Course of Action, Rationale) in WFDSS. If you have questions or concerns, contact me directly to discuss or clarify. The team should assist with the following:

- Keep line officer informed of significant accomplishments/issues of which can be documented in the Periodic Assessment throughout the duration of the incident.
- Through your risk assessment process, provide feedback regarding needed changes to the Incident Objectives and Course of Action to mitigate unnecessary risk to firefighters.
- Provide input regarding any other identified values to be addressed in planning operations and in the WFDSS Decision.
- Provide input to the current Risk and Complexity Analysis (RCA) in WFDSS and the need for updates; RCA updates can be made to document changed conditions without publishing a new decision.
- Provide support in updating and revising the decision as necessary, and/or determining if an update to components of the decision or documentation is needed (e.g., expectation that the planning area will be breached).
- Develop, update, and revise management action points as necessary to protect identified values (e.g., structural inholdings, communication sites, culturally sensitive areas) (The unit can list values here, or refer to WFDSS).

Throughout the life of the incident there will likely be oral discussions, agreements or changes in tactics/management of the fire as a whole that deviate from this letter or the WFDSS Decision documentation. Such deviations must be discussed with *me* in person so that we can determine solutions and update the WFDSS Decision as needed.

Human Resources

- All personnel assigned shall be treated with dignity and respect. Manage the human resources assigned to the fire in a manner that promotes a positive and harassment-free work environment and creates a “no tolerance” atmosphere for harassment, alcohol, or illegal drug use.
- All personnel assigned should receive evaluations prior to leaving the incident. Encourage supervisors to provide meaningful feedback regarding performance and conduct.

Operations

Attention to firefighter and aviation safety is an absolute necessity! Incident Action Plans should reflect leader's intent for the incident. Tactical actions will be assessed and effective mitigation measures will be in place to avoid putting firefighting personnel at unnecessary risk; Consider not implementing tactical actions by assessing the value being protected versus the risk (even if mitigated) required to protect it.

 - Document significant issues for values at risk within the ICS 209.
 - Utilize the Community and Structure Fire Protection Guidelines (refer to your local guidance if relevant).

 - Follow reporting guidelines for retardant use as defined in the briefing package.
 - Follow the guidance/protocol within the Wildfire Guidelines for Resource Protection if retardant is misplaced.
 - Use retardant only when and where it is expected to be successful in slowing fire spread or reducing intensities so ground firefighters may engage the fire more safely with a higher likelihood of success.
- Aviation
 - Aviation safety is a high priority. An Aviation Risk Assessment will be completed on all aviation missions in support of fire management. For additional guidance regarding Aviation Resources or local protocol refer to the Briefing Package and work with the Unit Aviation Officer or their designee as a liaison.
 - An initial TFR has been established for the fire area, coordinate changes to the current TFR with the Unit Aviation Officer.
- Initial Attack Operations
 - You will be responsible for Initial Attack activities within your designated TFR.
 - The local unit may call upon you for additional support as needed for Initial Attack activities.
