**Description:**

**Preliminary Priority Habitat (PPH) and Preliminary General Habitat (PGH):** Habitat designations developed by BLM and state agency biologists for all populations of GRSG (except the Bi-State and Columbia populations) which have been widely used since 2012. PPH is a higher value to protect, conserve and restore than PGH, and PGH is higher than other sagebrush vegetation.

**PPH:** Areas offering the highest quality GRSG habitat based upon bird density, lek location, community composition, intactness, or other variables.

**PGH:** Areas of relatively intact sagebrush communities which provide certain habitat requirements for GRSG.

## Boise Greater Sage-Grouse Habitat 2012 - 2015
