

# CONNECTING TO NIFC WIRELESS NETWORK – GFE MOBILE DEVICES: Samsung (Android)

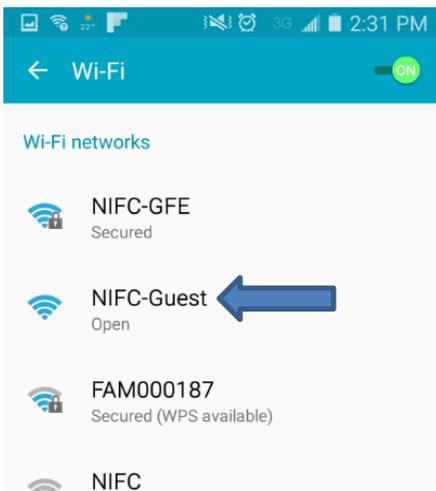

These instructions are intended for **NIFC Employees** that would like to use the **NIFC Wireless Network** using their Government Furnished Equipment (**GFE**) mobile device (**Samsung - Android**). **NOTE:** Minor variations from these instructions may occur depending on the device and its software version.

**Step 1:** Send an email request for access to NIFC Wi-Fi to [blm\\_fa\\_wireless@blm.gov](mailto:blm_fa_wireless@blm.gov). When you receive the response with your Wi-Fi credentials, follow these instructions:

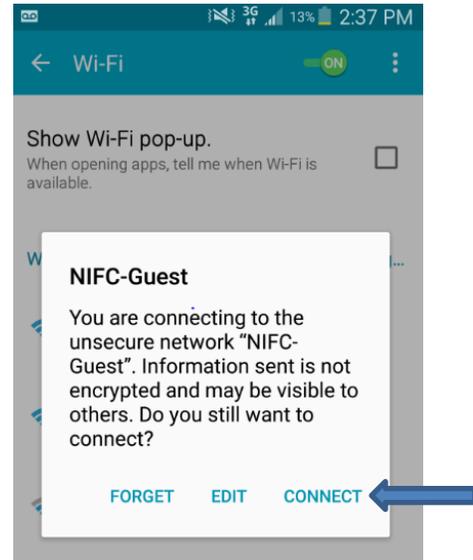

**Step 2:** Swipe down from the Samsung Logo to bring up your settings menu as seen below. Then select the Gear.

**Step 3:** Select “Wi-Fi” and then select “NIFC Guest” from the list.

**Step 4:** Select “Connect”.

**Step 5:** NIFC-Guest will then display “Connected”. (Only Temporary)

## MOBILE DEVICES: Samsung (Android)

**Step 6:** Open up Google Chrome on your device.

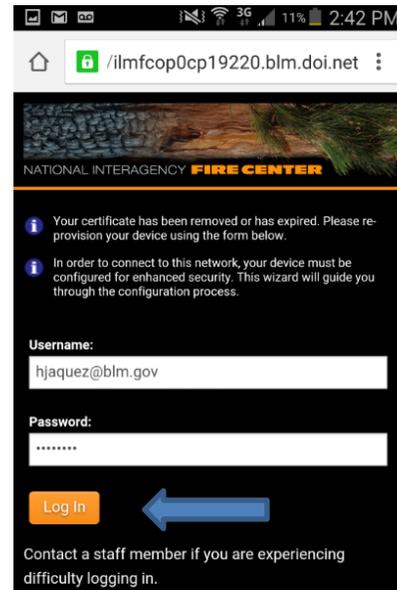

**Note:** Google Chrome is required and can be downloaded from Google Play. Try to go to a public website e.g. <http://www.google.com>. If the page “Connection is not private” displays, select “ADVANCED” and select the “hyperlink” on the screen that follows; if not, it will advance to the next step.

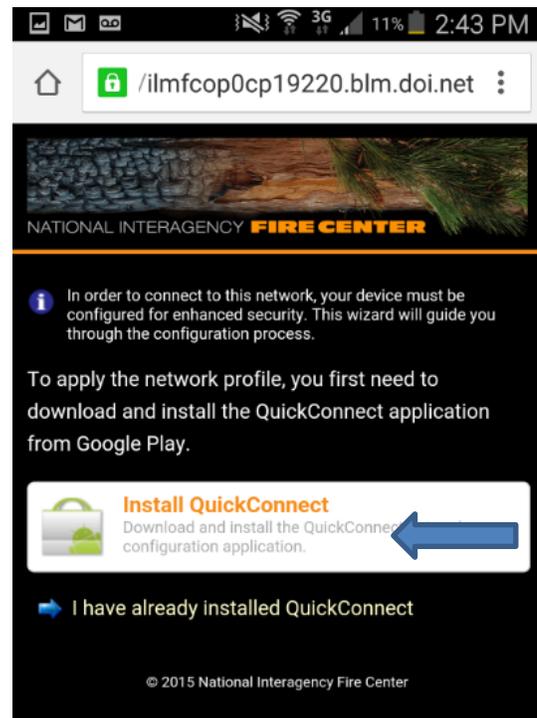

**Step 7:** Select “Register Government Furnished Device” on the NIFC Wi-Fi login page that appears.

**Step 8:** Fill in the form with your username and password provided to you via email, then select “Log In”

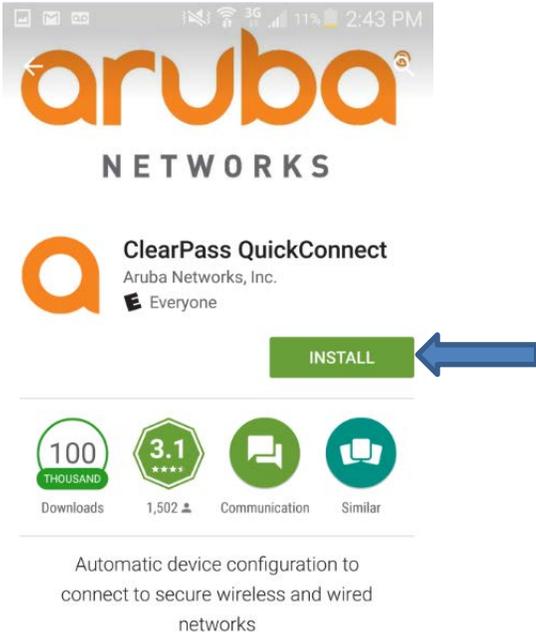

**Step 9:** Select “Install QuickConnect”.

## MOBILE DEVICES: Samsung (Android)

**Step 14:** Back on the NIFC Wi-Fi login again. Select “**Register Government Furnished Device**” again and proceed to the next step.

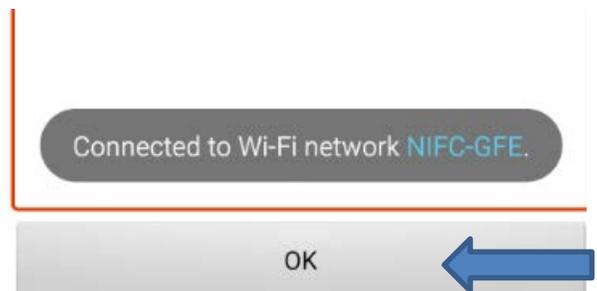

**Step 15:** Select “**Install Network Profile**”.

**Step 16:** Observe the profile installation

**Step 17:** Select “**OK**” when you see “Your device is now successfully connected to the NIFC-GFE network.”

**Note:** Within a few minutes your device should auto-connect to NIFC-GFE, if not; manually configure your network settings selecting **NIFC-GFE SSID** to access the Internet.
