

**Incident Management Situation Report  
Friday, October 17, 2025 – 0730 MDT  
National Preparedness Level 1**

**National Fire Activity (October 10, 2025 – October 16, 2025):**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (366 fires)
New large incidents:	7
Large fires contained:	5
Uncontained large fires:	6
CIMTs committed:	2
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

**[Understanding the IMSR](#)**

**[IMSR Map](#)**

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

**Northwest Area (PL 2)****Fire Activity and Teams Assigned****Totals**

New fires:	15
New large incidents:	0
Uncontained large fires:	4
CIMTs committed:	2

**Labor Mountain**, Okanogan-Wenatchee NF, USFS. CIMT (NW Team 3). Ten miles north of Cle Elum, WA. Timber and brush. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

**Lower Sugarloaf**, Okanogan-Wenatchee NF, USFS. CIMT (NW Team 2). Twelve miles northeast of Leavenworth, WA. Grass, brush and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

**Moon Complex**, Rogue River-Siskiyou NF, USFS. Eleven miles northeast of Agness, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Numerous structures threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Wildcat**, Okanogan-Wenatchee NF, USFS. Thirty miles west of Naches, WA. Timber, brush and closed timber litter. No new information. Last report unless significant activity occurs.

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

An upper-level trough will move through the northern half of the West this weekend into early next week with light to moderate valley rain and mountain snow. A cold front will move from the Plains to the East Coast this weekend into early next week with scattered to widespread showers and isolated thunderstorms. However, the front will be drier on the Plains, with breezy and dry northerly winds behind the front creating areas of elevated conditions in South Texas. As the front reaches the East Coast, it will slow down, with widespread wetting rain expected in the Northeast, but the front will be drier in the southern Appalachians to the Southeast. Strong southwesterly winds will redevelop Monday across North Texas into the central Plains and produce widespread elevated to critical conditions as the western storm emerges onto the Plains. The associated cold front will spread from the Plains to the East Coast next week, but be mostly dry. Meanwhile, a period of drier conditions is expected next week across the West before another Pacific storm arrives in the Northwest next Thursday and Friday.
