

**Incident Management Situation Report
Friday, April 25, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (April 18, 2025 – April 24, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (996 fires)
New large incidents:	26
Large fires contained:	24
Uncontained large fires:	11
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Fire Activity and Teams Assigned

Totals

New fires:	346
New large incidents:	11
Uncontained large fires:	4

HAOE Lead, National Forests in North Carolina, USFS. Eight miles northwest of Robbinsville, NC. Hardwood litter and light slash. Minimal fire behavior with smoldering and creeping. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

* **Curry Island**, Florida Forest Service. Started on private land 10 miles northeast of Deltona, FL. Grass. Active fire behavior with running.

Juniper Swamp, National Forests in Florida, USFS. Nine miles south of Bristol, FL. Timber and southern rough. Moderate fire behavior with running, flanking and backing. Trail closures in effect.

Johnson, Everglades NP, NPS. Previously reported incident. Thirteen miles southwest of Florida City, FL. Southern rough, grass and timber. Moderate fire behavior with flanking and backing.

Fire Activity and Teams Assigned

Totals

New fires:	440
New large incidents:	12
Uncontained large fires:	6

* **Jones Road**, New Jersey Forest Fire Service. Six miles southwest of Lacey, NJ. Timber. Active fire behavior with group torching, uphill runs and single tree torching. Residences threatened. Road closures in effect.

* **Danny's**, New Jersey Forest Fire Service. Four miles west of Independence, NJ. Hardwood litter. Moderate with creeping and isolated torching.

* **Packerton**, Pennsylvania Division of Forest Fire Protection. Two miles north of Lehighton, PA. Hardwood litter. Minimal fire behavior with smoldering. Structures and communication infrastructure threatened.

* **Thompson Hollow Road**, Pennsylvania Division of Forest Fire Protection. Ten miles southeast of Shippensburg, PA. Timber. Active fire behavior with running, torching and flanking. Area, road and trail closures in effect.

* **St. Joe**, Warroad Forestry Area, Minnesota DNR. Five miles northeast of Lancaster, MN. Timber, heavy slash and hardwood litter. Active fire behavior.

* **4 Square Mile**, Glacial Ridge, FWS. Five miles west of Mentor, MN. Grass and brush. Minimal fire behavior.

TOTAL ACRES:		95,973	840	36,441	5,027	762,075	73,473	973,830

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	14,413
Acres (2015 – 2024 as of today)	898,011

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Breezy easterly winds will create areas of elevated conditions across Florida today, with lighter winds this weekend before increasing again next week. Isolated thunderstorms on Monday may create new ignitions, as well. In the Southwest and Greater Four Corners, breezy and dry southwest winds gusting to 45 mph amid relative humidity will develop through Sunday, with the strongest winds Sunday when widespread elevated to critical conditions are expected. Cooler and less windy conditions are likely next week. One more day of low relative humidity is expected in the Mid-Atlantic today before a cold front brings light to moderate rainfall to much of the East Coast Saturday, but dry conditions return early next week, with breezy northwesterly winds possibly creating elevated fire weather conditions. A Pacific storm will move into California today and through the central and northern Intermountain West this weekend with light to moderate precipitation, falling as snow in the high elevations. While most areas of the West will be drier next week, scattered showers are possible over the northern Intermountain West. Periods of showers and thunderstorms are expected across the central and southern Plains, focused today and tomorrow, then again mid-next week. The northern Plains and Upper Midwest will remain dry through the weekend, before widespread wetting rain moves across the area early next week. Light to moderate southeasterly winds are expected across Hawai'i into early next week, with scattered showers, focused where sea breeze convergence is maximized. Mainly quiet weather with near normal temperatures are expected across Interior Alaska into mid-next week, while periods of showers continue across the southern and western coasts.
