NMAC Correspondence 2017-16

July 14, 2017

To: Geographic Area Coordination Groups, Incident Management Teams, Communications Unit Leaders, and Communications Technicians

From: National Multi-Agency Coordinating Group

Subject: Frequency Distribution Requirements and Air Tanker Base Directory Update

The purpose of this memo is to provide information about new requirements for radio frequency distribution. It also serves to inform the community of the misprinted Air Tanker Base Directory and corrective action taken.

All documents that contain frequencies must be labeled at the top and bottom of each page with a disclaimer that says, **Controlled Unclassified Information//Basic**. Steps are being taken to update I-Suite to meet these requirements in the future. Additionally, work is being completed to edit any ICS forms hosted by NWCG while also coordinating with DHS/FEMA and FireScope. Any locally/personally controlled versions of ICS documents that you may have, that contain frequency information, must also display this disclaimer at the top and bottom of each page.

Errors were found in the Air Tanker Base Directory printed May 2017. This issue has been corrected and the directory is being republished. Please ensure that the version dated "June 2017" is used. The corrected electronic version is currently on the NIFC FTP site as well as secure password protected sites at various GACCs. All versions now contain the Controlled Unclassified Information label.

/s/ **Dan Buckley**  
Chair, NMAC

CC: GACC Center Managers
