

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 20, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity:	Light (112) new fires
New large incidents:	8
Large fires contained:	13
Uncontained large fires:**	41
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	8

Nationally, there are 22 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

The U.S. has mobilized 12 federal wildland firefighters to support fire suppression efforts in Ontario, Canada.

Northwest Area (PL 3)

New fires:	17
New large incidents:	6
Uncontained large fires:	16
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6

Substation, Wasco County. IMT 1 (Schulte). Started on private land five miles south of The Dalles, OR. Brush and tall grass. Active fire behavior with uphill runs, wind-driven runs and short-range spotting. Numerous structures threatened. Evacuations, road and area closures in effect.

Garner Complex (4 fires), Grant Pass Unit, ODF. ODF IMT 1 (Cline). Four miles east of Cave Junction, OR. Timber and medium logging slash. Active fire behavior with group torching, flanking and backing. Residences threatened. Evacuations and road closures in effect.

South Umpqua Complex, Umpqua NF. IMT 2 (Sheldon). Thirty miles southeast of Myrtle Creek, OR. Timber. Active fire behavior with uphill runs, torching and flanking. Residences threatened. Evacuations in effect.

Natchez, Rogue River-Siskiyou NF. IMT 2 (Lawson). IMT is also managing the Klondike and Granite incidents. Fifteen miles southeast of Cave Junction, OR. Timber, chaparral and hardwood litter. Active fire behavior with torching, backing and flanking. Structures and energy infrastructure threatened.

* **Klondike**, Rogue River-Siskiyou NF. Nine miles northwest of Selma, OR. Hardwood litter and brush. Active fire behavior with flanking, torching and uphill runs. Residences threatened.

* **Granite**, Rogue River-Siskiyou NF. Nine miles northwest of Selma, OR. Brush and hardwood litter. Moderate fire behavior with flanking and backing. Residences threatened.

Hendrix, Rogue River-Siskiyou NF. IMT 2 (Harrod). Three miles southwest of Ashland, OR. Timber and medium logging slash. Active fire behavior with uphill runs, single-tree torching and short-range spotting. Residences threatened. Evacuations in effect.

* **Timber Crater 6**, Crater Lake National Park, NPS. IMT 2 (Goff). Twenty miles southwest Chemult, OR. Timber. Active fire behavior with group torching, short crown runs and spotting. Road, area and trail closures in effect.

Sugar Pine, Rogue River-Siskiyou NF. IMT 2 (Gales). Twelve miles northwest of Prospect, OR. Timber. Moderate fire behavior with single-tree torching, backing and uphill runs.

Cemetery, Prineville District, BLM. Transfer of command from IMT 2 (Johnson) back to the local unit will occur on 7/22. Thirty-two miles southeast of Prineville, OR. Timber, brush and tall grass. Minimal fire behavior. Sage-grouse habitat threatened.

* **Boylston**, Southeast Region, Washington DNR. Thirteen miles east of Ellensburg, WA. Brush and tall grass. Extreme fire behavior with running and wind-driven runs. Structures threatened. Evacuations, road and area closures in effect.

* **Buckshot**, Spokane District, BLM. Started on private land two miles south of Mattawa, WA. Brush and tall grass. Active fire behavior with running and spotting. Numerous residences threatened. Evacuations, road and area closures in effect.

* **L RD SW**, Mid-Columbia National Wildlife Refuge Complex, FWS. Nine miles southeast of Mattawa, WA. Brush and grass. Moderate fire behavior with backing, flanking and creeping. Road closures in effect.

Upriver Beacon, Northeast Region, Washington DNR. Three miles northeast of Spokane, WA. Timber, brush and short grass. Minimal fire behavior. Numerous residences threatened. Evacuations, trail and area closures in effect.

HWY 97 & MP 37, Yakama Agency, BIA. Twenty-two miles north of Goldendale, WA. Timber, brush and short grass. No new information. Last report unless new information is received.

Predictive Services Discussion: A low-pressure area will drop south into southern British Columbia and will increase the westerly flow over Washington and northern Idaho. Critical fire weather conditions may be possible across the northern Columbia basin as breezy winds develop and interact with low humidities in the afternoon. Further south, the Four Corners high-pressure area will drift east a bit allowing for monsoonal moisture to work its way north into the northern Great Basin ahead of a developing front to the north. The boundary for convective activity will be mostly south of a line from Lake Tahoe to Twin Falls, Idaho to Jackson, Wyoming. In the East, Michigan will receive much needed precipitation from a passing cold front. However, Texas will remain hot and dry as the state sinks further into drought.

Helicopter Performance

Aviation Category

Certain helicopter missions push the limits of the aircraft's performance capabilities. Items that reduce the effectiveness and increase the risk of the mission include weight, temperature, altitude, and visibility.

- Helicopter missions that transport external loads increase risk.
- Helicopters performance/lift capabilities decrease as temperature and/or altitude increase. Be watchful of conditions that are High, Hot and Heavy!
- All helicopters have different maximum performance capabilities, so be aware of the capabilities of the specific helicopter that you are working with.
- Low-level helicopter operations often occur in heavy smoke where hazards (e.g., trees, snags, antennas, visibility, turbulence, and other aircraft) increase the risk level significantly.
- Determine the risk level for every mission. Is the risk level acceptable? Can the risk be mitigated? If the risk is not acceptable or it cannot be mitigated, then the mission should not be flown.
- A large part of the success of a helicopter mission is the result of good communications between the pilot and the user on the ground.
- Accurate target and hazard descriptions are essential to a safe mission. Locate this information and relay it to the pilot. Things to consider in the target description include:
 - Have you considered what the target would look like from the air?
 - Are you located where the pilot can see you?
 - Do you have a signal mirror?
 - Are you using cardinal directions or clock directions in relation to the track of the aircraft?
 - What is the wind direction? Provide this information to the pilot.
 - Are all firefighters clear of the drop area?
 - Is there a safer way to carry out an effective suppression action?

Activity: *If available, have a pilot explain how the load calculation is done and the effects of density altitude on the aircrafts' capability and allowable.*
