# Incident Management Situation Report 

Friday, March 8, 2024 - 0730 MDT
National Preparedness Level 1
National Fire Activity (March 4, 2024 - March 7, 2024):

Fire Activity and Teams Assigned
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:
Complex IMTs committed:
NIMOs committed:

Totals
Light (169 fires) 1520171

0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

## Geographic Area Daily Reports

## Understanding the IMSR

## IMSR Map

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

## Southern Area (PL 3)

## Fire Activity and Teams Assigned

## Totals

New fires:
New large incidents: ..... 10
Uncontained large fires: ..... 12
Complex IMTs committed: ..... 1

Smokehouse Creek, Texas A\&M Forest Service. CIMT (SA Team 2). CIMT is also managing the Windy Deuce and Grape Vine Creek fires. Started on private land one mile north of Stinnett, TX. Grass and brush. Moderate fire behavior with creeping and smoldering. Numerous structures and energy infrastructure threatened. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Windy Deuce, Texas A\&M Forest Service. Started on private land six miles east of Masterson, TX. Grass and brush. Moderate fire behavior with creeping and smoldering. Numerous residences and energy infrastructure threatened. Area and road closures in effect. Precipitation occurred over the fire area yesterday.

Grape Vine Creek, Texas A\&M Forest Service. Started on private land nine miles southwest of Lefors, TX. Moderate fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

Catesby, Oklahoma DOF. Four miles south of Catesby, OK. Grass and timber. Minimal fire behavior with smoldering. Reduction in acreage due to more accurate mapping.

Slapout, Oklahoma DOF. Six miles west of Laverne, OK. Grass and brush. Minimal fire behavior with smoldering. Residences threatened.

Brushy Crossing, National Forests in Florida, USFS. Twelve miles north of Sumatra, FL. Southern rough. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

* Concharty Church, Okmulgee Agency, BIA. Ten miles west of Haskell, OK. Hardwood litter. Moderate fire behavior with backing and smoldering. Structures threatened.
* Clyne, Okmulgee Agency, BIA. Six miles southeast of Stroud, OK. Hardwood litter. Moderate fire behavior with backing and smoldering.
* Cooper, Oklahoma DOF. Five miles west of Fort Supply, OK. Grass, brush and hardwood slash. Minimal fire behavior with backing and smoldering.
* Runaway Hollow, Cherokee Nation Tribe. Six miles southwest of Jay, OK. Timber. Active fire behavior with running, flanking and backing. Structures threatened.
* Arkoma, Okmulgee Agency, BIA. One mile southwest of Hanna, OK. Timber. Active fire behavior with running, flanking and backing. Structures threatened.
* Pel Range \#63, Alabama Forestry Commission. Four miles northwest of Anniston, AL. Brush. Minimal fire behavior.

Disclaimer: Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

Light snow and mixed precipitation will continue into this afternoon across portions of the central and southern High Plains before drier weather returns for the weekend. Breezy and dry west to northwesterly winds will bring elevated to locally critical conditions to the Rio Grande Valley today as well. A strong cold front will move from the Mississippi Valley today to the East Coast this weekend, with widespread rain. Severe thunderstorms are possible from east Texas through the Southeast, with heavy rain and potential flooding from Mississippi into South Carolina. Another storm will move into the West on Sunday through mid-next week with rain, and snow above 4,000 to 6,000 feet, but much of central and southern California will only see scattered light precipitation. The storm will emerge onto the Plains next week, with precipitation likely to return to portions of the central Plains to the Lower and Mid-Mississippi Valley, while breezy and dry conditions are possible for portions of the southern Plains. However, much of the northern Plains into Minnesota, northern Wisconsin, and the Upper Peninsula of Michigan will remain dry the next week with above normal temperatures. Interior Alaska temperatures will remain well below normal for the next week, with periods of snow for southwest Alaska and possibly into south-central Alaska. Strong, but generally moist trade winds will continue across Hawai'i for the next week, with widespread showers likely late this weekend into mid-next week.

## National Predictive Services Outlook

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Lookout (LCES).
