

Incident Management Situation Report
Friday, May 9, 2025 – 0730 MDT
National Preparedness Level 1

National Fire Activity (May 2, 2025 – May 8, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (847 fires)
New large incidents:	8
Large fires contained:	8
Uncontained large fires:	10
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

New fires:	185
New large incidents:	3
Uncontained large fires:	5

Black Swamp, National Forests in North Carolina, USFS. Six miles southeast of Maysville, NC. Chaparral and southern rough. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

* **Sunset Rd**, North Carolina Forest Service. Transfer of command from CIMT (NC State Team 2) back to the local unit occurred yesterday. One mile southwest of Boiling Spring Lakes, NC. Southern rough. Moderate fire behavior with creeping and smoldering. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

Johnson, Everglades NP, NPS. Thirteen miles southwest of Florida City, FL. Southern rough, grass and timber. Minimal fire behavior with creeping and backing.

* **SE 1ST**, Florida Forest Service. Four miles east of Silver Springs, FL. Timber and southern rough. Minimal fire behavior with smoldering.

* **Avon Park**, Avon Park Air Force Base, DOD. Sixteen miles northeast of Avon Park, FL. Grass, timber and southern rough. Moderate fire behavior with flanking and backing. Precipitation occurred over the fire area yesterday.

TOTAL FIRES:		831	192	108	110	22,112	1,062	24,415
TOTAL ACRES:		100,591	953	38,557	10,364	783,727	84,107	1,018,298

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	17,121
Acres (2015 – 2024 as of today)	993,424

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Very warm, above normal temperatures are expected across the Intermountain West through the weekend, with record-setting temperatures spreading into the northern Plains and Upper Midwest Sunday through Tuesday. A deep upper-level trough will move into the West early next week, with increasing winds across the Great Basin, Southwest and West Slope Sunday through Tuesday. Elevated to critical conditions are most likely in southeast Arizona into southwest New Mexico where little precipitation has fallen the past week. Southerly winds will also increase Sunday through Tuesday across the northern Plains and Minnesota, with minimum relative humidity as low as 10%, creating widespread elevated to critical conditions. As the trough moves into the West, light to moderate precipitation will spread across the northern half of the West Monday through Wednesday, while dry westerly winds continue in the Southwest through the week. Scattered showers will spread into the northern Plains, as well, Wednesday into Thursday, but may be more isolated farther east into Minnesota.

Drier conditions are expected across the central and southern Plains, but recent rainfall will mitigate any concern. Widespread wetting rain will fall into early next week across the Southeast, including much of Florida and the Carolina coast bringing relief from the very dry conditions. Lighter precipitation is also expected today and tomorrow in the Mid-Atlantic and Northeast. Near to below normal temperatures are expected across Alaska into early next week, with showers gradually ending across the southern half of the state today and tomorrow, before another round of precipitation moves into the southern half of the state early next week. Moderate trade winds will continue across Hawai'i, with enhanced shower activity into Saturday before drier conditions emerge early next week.
