

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, AUGUST 20, 1994 - 0700 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: Moderate initial attack activity continued throughout the west. Low fuel moistures and/or resource shortages are hampering suppression efforts on several large fires. A Type I Incident Management Team was mobilized to the Eastern Great Basin from the Rocky Mountain Area. Crews being mobilized to the Northern Rockies from the Southwest and Eastern Areas were diverted to the Eastern Great Basin. Demobilization from the Northwest and on resources meeting the 21 day commitment continues.

There is a shortage of crew bosses and crew representatives. Training of additional crews should continue only in those areas that still have available crew bosses/representatives.

A 6th military battalion from Ft. Lewis, WA will provide suppression assistance to the Little Wolf fire, Flathead NF. Training began yesterday and will continue today, with deployment scheduled for tomorrow, 8/21.

Colonel Anthony Palermo USMC, is the Task Force Commander of the two Marine Battalions assigned to the Tyee fire and the West Kocanusa Complex. Colonel William T. Maddox, USA, is the Task Force Commander for three Battalions and one Aviation Battalion assigned to the Corral Creek and 17 Mile fires and the Idaho City Complex.

Northern Rockies Area Large Fires:

LITTLE WOLF, Flathead NF. A Type II Incident Management Team (Bennett) is committed. Effective use of airtankers, helicopter bucket drops and aggressive hand crew attack on spot fires prevented major runs, although the fire spotted across dozer lines on at least 3 divisions.

YAAK-RED DRAGON COMPLEX, Kootenai NF. A Type I Incident Management Team (Meuchel) is committed. The 3/82nd Field Artillery Battalion, 1st Cavalry Division (Lt. Col. Marcus Dudley) is assigned. The complex is comprised of 32 active fires including the 17 MILE, ZIMMERMAN, PULPIT, STUDEBAKER, FISHFRY, FOWLER, TURNER and many other smaller fires. A number of fires continue to exhibit very active fire behavior with significant increases in acreage. The Pulpit and Fowler fires made major runs yesterday. A strong inversion continues to limit air suppression and is inhibiting detection of new fires.

CABINET COMPLEX, Kootenai NF. A Type II Incident Management Team (Groshong) is committed. Thirteen fires have been located within the complex. The Porcupine and Roberts are the only 2 that have been staffed.

KOOCANUSA COMPLEX, Kootenai NF. A Type I Incident Management Team (Lee) is committed. The 1st Battalion, 5th Marine Regiment, (Lt. Col. Dave Bonwit, Commander) is assigned. A primary problem within this complex is the long travel time it takes to reach fireline assignments.

WILDERNESS COMPLEX, Kootenai NF. The complex consists of the WILLIAMS, SCENERY, LEIGH and McKAY fires. Visibility limitations and helicopter availability prevented low level reconnaissance.

ANN, Bitterroot NF. A Type II Incident Management Team (Spradlin) is committed. The fire experienced erratic fire behavior on the west and southeast flanks. Crews were pulled off of one division because of concern for firefighter safety.

STARVATION CREEK, Glacier NP. A Type II Incident Management Team (Danforth) is committed. Fire spread continues towards the Canadian border, with less than 1/2 mile remaining. Plans are to tie the west fireline into the dozer line at the Canadian border with fire line explosives. Canada is supporting these efforts with limited air support. A historical cabin and high value timber are still threatened.

WOLF MOUNTAIN II COMPLEX, Montana State. A Type II Incident Management Team (Bosworth) is committed. The line was lost on the south side of Twin Meadows due to spotting. On the job training was completed for 3 emergency firefighter crews on Wolf Mtn.

TROUT CREEK COMPLEX, Kootenai NF. The incident name has changed, it was reported yesterday as the PILICK fire. A Type II Incident Management Team (Suenram) is committed. The team will prepare structure protection plans for residences along Highway 200 and Highway 56 today.

BITTER-NEZ, Bitterroot NF. A Type II Incident Management Team (Wetzsteon) is committed. The complex consists of the SADDLE, MAGRUDER, NICK and SAWTOOTH fires.

ST. JOE COMPLEX, Idaho Panhandle NF. A Type II Incident Management Team (Hart) is committed. The complex is comprised of 8 contained fires, 4 holdover fires and 5 new starts. Erratic winds caused the fires to test the line yesterday. Falling snags and rolling material continue to present safety and control problems on the 1956 North fire.

PRIEST LAKE COMPLEX, Idaho Panhandle NF. A Type II Incident Management Team (Kechter) is committed. The fire continues to spread, torching and spotting to the north-northwest approaching the wilderness boundary of the Colville NF. Extremely dry conditions caused control problems yesterday.

SELWAY BITTERROOT COMPLEX, Clearwater NF. A Type II Incident Management Team is committed. The complex consists of six large fires burning in the Selway Bitterroot Wilderness. The fires are unstaffed due to the limited resources and firefighter safety concerns. Retardant and helicopters are being used to help contain and confine the fires.

YELLOWSTONE COMPLEX, Yellowstone NP. Both the Tern and Raven fires will be managed under confinement strategy. This will be the last report unless significant activity occurs.

Eastern Great Basin Area Large Fires:

CORRAL CREEK, Payette NF. A Type I Incident Management Team (Johnson) is committed. The 14th Engineer Battalion, (Lt. Col. Perrenot, Commander) is committed. Helicopter support is being provided by the 4th Battalion, 227 Aviation Regiment, 1st Cavalry Division, USA (Lt. Col. Myles, Commander). The fire continues to spread to the northeast. Suppression forces are working to stop the fire's advance into Hazard Creek.

BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is committed. This is a unified command with Idaho State Department of Lands, represented by Bill Williams. A major burnout operation on the west flank has been completed.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Eddy) is committed. The 20th Engineer Battalion, 1st Cavalry Division, USA (Lt. Col. Bruce Porter, Commander) is committed. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK and NORTH FORK fires. Night shift crews were diverted to the new Star Gulch fire. The east flanks exhibited extreme fire behavior yesterday. Helicopter support was minimal due to heavy smoke. Threats continue to structures at Barber Flat, Deer Park area, Sunset Lookout and numerous timber sales in the vicinity.

BEAVER MTN., Wasatch-Cache NF. Structure protection remains high priority.

TIN CUP COMPLEX, Caribou NF. A Type II Incident Management Team (Casey) is committed. The complex is comprised of the TIN CUP and BROWNS fires.

THUNDERBOLT, Boise NF. A Type I Incident Management Team (Denton) is committed. Helicopter support is being provided by the 4th Battalion, 227 Aviation Regiment, 1st Cavalry Division, USA (Lt. Col. Myles, Commander). The fire is moving north and east through heavy fuels (400 ton/acre). Burnout operations above the South Fork of the Salmon River are progressing well.

PIONEER CREEK, Challis NF. A Type II Incident Management Team (McAtee) is committed. Loon Creek Guard Station and Diamond D Ranch are now less than 1/8 mile from the fire. Historic townsites and a mine are also threatened.

STAR GULCH, Boise NF. A Type I Incident Management Team (Richer) will take over the fire today. The fire is located approximately 9 miles southwest of Idaho City. One structure has been destroyed. The smoke inversion from the Idaho City Complex limited the use of airtankers. Threats are to 8-10 rural structures.

Northwest Area Large Fires:

TYEE CREEK, Wenatchee NF. A Type I Incident Management Team (Maupin) is committed, with a State Team (Flannigan) under unified command. The 5th Battalion, 11th Marine Regiment (Lt. Col. Rick Lindsey, Commander) is assigned. Five CH-47 helicopters from the 214th Aviation Unit, Fort Lewis, WA are assigned. The perimeter of the fire has slightly increased with the majority of the fire activity continuing in Billy and Cougar Creek drainages. Burnout operations are assisted by favorable humidities and winds. Fire activity was moderate yesterday with three significant spots crossing the line.

HATCHERY COMPLEX, Wenatchee NF. A Type II Incident Management Team (Furlong) is committed. Higher humidities kept the fire from making any significant advances. Two active fronts remain in Eightmile Creek and at the top of Tumwater Canyon. Eleven crews are spiked out on the wilderness portions of the complex.

OKANOGAN COMPLEX, Okanogan NF. The complex is comprised of the RAINBOW/BOULDER/BUTTE, POORMAN, BURNT SAW, FALLS CREEK and MISC. ABC fires. Heavy smoke conditions prevented helicopter water bucket operations. Reconnaissance shows that the objectives of preventing spread down Boulder Canyon and down slope toward Stehekin continue to be met. Spread is confined within Boulder and Rennie Creek drainages. Demobilization is in progress.

SNAKE RIVER COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is committed. Three CH-47 helicopters from the 214th Aviation Unit, USAR, Fort Lewis, WA are assigned. This complex is comprised of the RAPID RIVER, SADDLE CREEK, HAAS HOLLOW, and SWAMP CREEK fires. Burnout operations continued in the southeast flank. Low fuel moisture and light upslope winds created torching and short runs within the fireline perimeter.

BOUNDARY, Wallowa-Whitman NF. A Type I Incident Management Team (Shaw) is committed. Success with the burnout operation has been variable, with excellent progress on some divisions while others had mixed results because of unfavorable wind or humidity. Fuel moisture is extremely low in all size classes and is not recovering at night. The fire still threatens a historic lookout tower and cabin and private land.

Outlook: High pressure continues to influence the weather pattern throughout the Intermountain West and Southwest. The Pacific Northwest will be under the influence of an upper level trough coming onshore today. This trough will bring cooler temperatures and gusty winds to Washington and Oregon. The remainder of the west will continue to have warm daytime temperatures and low humidities. Demobilization of resources meeting the 21 day commitment and remobilization of rested resources will continue. Burning conditions on large fires will be active today with the increasing winds.
