Outlook: Low humidities, strong north winds and temperatures in the mid 90s will spread from southern California into Arizona. A few showers are possible over southern New Mexico, but sunny weather will dominate over most of the West, with high temperatures ranging from the 60s and 70s in the north to the 70s and 80s in south. Initial attack and large fire activity are expected to increase slightly as a result of the warming, drying trend.
