

INCIDENT MANAGEMENT SITUATION REPORT  
TUESDAY SEPTEMBER 20, 1994 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Several areas in the West experienced increased initial attack activity. Large fire activity continued to increase in northern California. Five Type I crews, a caterer, two showers, two Type I helicopters, two Type II helicopters and two airtankers were mobilized to northern California in support of the new fires.

Eastern Great Basin Area Large Fires:

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Maupin) is assigned. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK, NORTH FORK and STAR GULCH fires. The fuels remain extremely dry and are contributing to continued torching. Heavy, downed fuels and steep terrain are slowing line construction and present a safety concern for crews. The evacuation of Grandjean and Wapiti Creek will be lifted this morning.

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Martin) is assigned. Mop-up activities were concentrated in hot areas identified by IR scanning. Rehabilitation of the fire line continues. The four Americorp crews have had a variety of duties to date, including line construction, rehabilitation and hot spotting.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Fire activity increased in the afternoon, and 540 more acres burned.

CHICKEN COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is assigned. Torching and short runs occurred within the the fire perimeter. Higher temperatures and lower humidity increased activity. An additional 412 acres burned yesterday.

North Zone - California Large Fires:

BARKLEY, Lassen NF. A Type II Incident Management Team (Madden) is assigned. This fire is located 30 miles east of Redbluff. If the fire moves to the east, structures will be threatened. Burnout operations are being planned.

COFFEE COMPLEX, Shasta-Trinity NF. A Type II Incident Management Team (Jansen) is assigned. This complex is comprised of the SCORPION, SLIPPER, CHIPMUNK, SALOON and COPPER fires. The fires are located 81-96 air miles north northeast of Weaverville. The fires were active throughout the day, with mid-afternoon

runs occurring.

McCOY, Lassen Modoc Ranger Unit, California State. The fire is located 6 miles northeast of Eagle Lake. Strong winds caused numerous spots ahead of the fire.

Outlook: A RED FLAG WARNING is posted for strong winds and low humidities over the Oregon Cascade mountains. A RED FLAG WATCH is posted for dry thunderstorms over the central and southern Sierras of California and for Nevada. A RED FLAG WATCH is posted for east winds developing over the Washington Cascade and Olympic mountains. Warm high pressure will continue over the northern portion of the Northwest, while an upper low over southern California spreads clouds, scattered showers and thundershowers into Nevada and Utah. Isolated thunderstorms will occur in the remainder of the West, mainly east and south of the of the Cascades and Sierras. Fire activity is expected to continue with red flag conditions.
