

INCIDENT MANAGEMENT SITUATION REPORT  
 THURSDAY, AUGUST 31, 1995 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

\*\*\* THE TEN STANDARD FIRE ORDERS ARE FIRM \*\*\*  
 \*\*\* WE DON'T BREAK THEM; WE DON'T BEND THEM \*\*\*

Current Situation: The South Zone large fires continued to experience active fire behavior. The Northern Rockies experienced increased large fires, however, no problems were reported and containment was met on most of them. Resource mobilization through NICC continued to the Eastern Area and southern California.

South Zone Large Fires:

EL MONTE, Cleveland NF. A Type I Incident Management Team (Giachino) is assigned. The fire made another run to the east yesterday afternoon consuming another 600 acres. Structures to the south and east of the fire along with endangered species habitat are threatened. The fire is burning in extremely steep, rugged and inaccessible terrain that has not burned in 40 years.

SYCAMORE, San Diego Ranger Unit, California State. A State Type I Incident Management Team (Gregory) will assume command of the fire at 0600 this morning. The fire burned actively in heavy fuels and is threatening the community of Dulzura. A smoke inversion over the fire limited air support.

OUTLOOK: An upper level low pressure system is spinning off of the northern California and Oregon coast. Isolated thunderstorms are forecast from the Oregon Cascades westward, the Colorado mountains and southern Nevada. Northern Nevada, southeast Oregon, southern Idaho and western Wyoming will be very warm and dry. Weak high pressure persists over the four corners area continuing the pattern of scattered mostly wet thunderstorms over Arizona and western and northern New Mexico. High temperatures will range from the upper 60's along the Pacific Northwest coast, 90's to 112 in the Southwest deserts and 80's and 90's for the remainder of the West. High pressure will remain over the

northeastern U.S. with sunny and warm conditions. A weak cold front will move through the area overnight and early Friday, bringing a slight chance of thunderstorms. Highs will be mostly in the 80's to low 90's with southwest winds at 10-15 MPH. Moderate fire activity and resource mobilization is expected to continue.
