Outlook: A deep marine layer will keep the air mass cool and moist west of the Cascade mountains of the Pacific Northwest. Widely scattered thundershowers will develop again Sunday over the Rocky Mountains and the Northern Great Basin, with near normal temperatures for those areas anticipated. Sunny and hot weather is forecast for the California interior, Arizona and New Mexico. Temperatures will be in the 70's to low 90's over much of the West. Southern Nevada and the deserts of California, New Mexico and Arizona can expect temperatures over 100 degrees.
