

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JUNE 19, 1995 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

Current Situation: Cooler temperatures, higher humidities and decreased winds have moderated fire activity in the Southwest Area. Good progress was made toward containment on several fires. An airtanker was mobilized from the Rocky Mountain Area to Minnesota yesterday. An Infrared aircraft was mobilized to Canada. Four type I crews have been released from Canada and will return to Redmond, OR. this afternoon. Large fire activity continued in Canada with 125,226 additional acres burned.

Southwest Area Large Fires:

WATER, New Mexico State. A Type II Incident Management Team (Blackwell) has been assigned. Demobilization is planned for today including the Incident Management Team.

TURKEY, Cibola National Forest. High winds prohibited helicopter water drops yesterday. Increasing humidity is allowing crews to make progress.

BDU = San Bernardino R.U., California Department of Forestry and Inyo NF.

Outlook: New Mexico will be mostly sunny in the west and partly cloudy in the central and east with a few afternoon and evening thunderstorms. Temperatures will be warmer with highs in the 70's in the mountains and 80's and lower 90's in the lower elevations. Arizona will be sunny, warmer and drier, with breezy conditions in the north. Highs will range from the 70's in the mountains to near 104 in the southern deserts. Southern California will be mostly sunny and a little warmer. Highs will be in the 70's along the coast and mountains to the 90's inland and just over 100 in the eastern deserts. The interior of Alaska will be partly cloudy with a few afternoon showers or thundershowers. Highs will be in the 60's to mid 70's. Moderate fire activity is expected to continue in the Southwest Area. Temperatures in the 90's coupled with low humidities and breezy conditions is expected to increase fire activity in Minnesota.
