

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, OCTOBER 2, 1995 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL II

Current Situation: Moderate fire activity was reported in California, while the remainder of the U.S. continued to experience minimal activity. A NIFC contract jet was mobilized to the Southern Area to provide personnel transport in support of Hurricane Marilyn recovery efforts.

Hurricane Marilyn Support:

A NPS All Risk Management Team (Wissinger) continues to assist in the repair of Park facilities and housing. A replacement Team has been ordered and will arrive on 10/4 to assume operational responsibility on 10/6.

Southcentral Alaska Flood Response:

A Type I Incident Management Team (Liebersbach) in Anchorage, a Type II Incident Management Team (Wilcock) in Soldotna and a Type II Incident Management Team (Stam) in Seward are assigned to the State of Alaska to assist in damage assessment and relief activities. Disaster Information Centers are being set up in Soldotna, Seward and Skwenta. The river level at Kenai Keys and Soldotna are expected to drop below flood stage this morning. Diversion work on the Resurrection River is expected to be complete tomorrow. Hazard assessments, road repairs and debris collection continue. To date 145 homes have been damaged and one home destroyed.

OUTLOOK: *** FIRE WEATHER WATCHES AND RED FLAG WARNINGS ARE POSTED FOR PARTS OF CALIFORNIA AND ARIZONA FOR GUSTY WINDS AND LOW RELATIVE HUMIDITY. ***

High pressure will build over the Northern Rockies this morning bringing sunny and stable conditions to most of the West. A weak weather system will bring a few showers to northern Idaho and western Montana early in the day. Strong pressure gradients along the western and southern sides of the Northern Rockies high pressure area will produce gusty dry winds for California and Arizona. High temperatures will range from the 40's and 50's in the Northern Rockies to the 60's and 70's in the Pacific Northwest and Great Basin. California and the desert Southwest will have highs in the 80's and 90's. Increased fire activity is possible in California and Arizona with posted watches and warnings.
