

INCIDENT MANAGEMENT SITUATION REPORT  
 FRIDAY, SEPTEMBER 1, 1995 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

\*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*

Current Situation: Significant fire activity continued in South Zone California, while the remainder of the U.S. experienced moderate fire activity. Resource mobilization through NICC continued to southern California. Pre-suppression mobilization of severity resources for the Eastern Area has begun in response to extreme fire danger associated with drought conditions across the northeast region.

South Zone Large Fires:

EL MONTE, Cleveland NF. A Type I Incident Management Team (Giachino) is assigned. Structures continue to be threatened to the south and east of the fire, along with endangered species habitat.

SYCAMORE, San Diego Ranger Unit, California State. A State Type I Incident Management Team (Gregory) is assigned. The fire could jump Highway 94, and is a serious threat to the community of Dulzura, the Daily Ranch and native spiritual grounds.

POWAY, San Diego Ranger Unit, California State. A State Type I Incident Management team has been ordered. The threat to structures is high. No other information received.

ELM, Riverside Ranger Unit, California State. Good progress has been made on the fire. Indications are that the fire will be held.

FLAT TIRE	MTS	MT	2,100	100			0	0	0	0	0	UNK

MTS = Montana State

OUTLOOK: An upper level low pressure system will continue to hold off of the northern California and Oregon coast. Isolated to widely scattered thunderstorms, a few which could be dry, will spread from the Nevada/Utah border across southeast Idaho and into western Wyoming. Very warm and dry air will continue over southeast Oregon, the upper half of the Great Basin Area and western Wyoming. High pressure persists over the Four Corners area

continuing to bring scattered wet thunderstorms over Arizona and New Mexico. High temperatures will range from the upper 60's along the Pacific Northwest coast, 90 to 114 degrees in the Southwest deserts and 80's and 90's for the remainder of the West. The Northeast U.S. will have a cold front dropping southeast across the coast this morning. High pressure behind the the front will bring warm and dry weather through the weekend. High temperatures will be in the 80's, with north to northwest winds at 10-20 MPH. The potential for increased activity exists nationwide due to the human caused risk associated with the approaching holiday weekend
