Subject: Missing Report 04-Sep-95 -Reply

Hi Mr. Muffley,  
Please let me know if this did or did not work. I don't trust this  
system yet. C-Ya

INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, SEPTEMBER 4, 1995 - 0900 MDT  
NATIONAL PREPAREDNESS LEVEL II

\*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*\*

Current Situation: Increased initial attack and large fire activity  
occurred in several areas of the West. Resource mobilization through

NICC increased yesterday. A NIFC jet has been provided to Canada to  
do  
an internal demobilization today.

Northwest Area Large Fires:

PRINGLE, Deschutes N.F. The fire is burning on both sides of the  
Deschutes River. Several subdivisions are evacuated. Control  
problems  
are heavy dead and down lodgepole with low fuel moisture.

LABOR, Deschutes N.F. Burning in bug killed lodgepole, this fire has  
  
few natural barriers to assist control efforts. The potential for  
extreme fire behavior exists due to heavy fuel loading and low fuel  
moisture.

DEAD HORSE FLAT, Wallowa-Whitman N.F. A Type II Incident Management  
Team (Lukens) is assigned.

#### Eastern Great Basin Large Fires:

DUGWAY #3, Salt Lake District, BLM. A burnout operation coupled with air support controlled the fire on the DOD side of the fire.

HEIL WELL, Southern Idaho District, BLM. Control problems are high winds associated with thunderstorm passage and heavy brush. Present concern is for the protection of livestock.

OUTLOOK: \*\*\*\*\* A FIRE WEATHER WATCH IS POSTED IN MONTANA FOR SCATTERED DRY THUNDERSTORMS. \*\*\*\*\* An upper level low pressure system off the Washington coast will move northeast to the Cascades late tonight. Widely scattered showers with a few thunderstorms are forecast for Washington and Oregon. A slow moving weak surface cold front will extend from eastern Oregon and Washington to northwest Nevada. Monsoon moisture will spread northeast from northeast Nevada into northern Utah and through Idaho, Wyoming and Montana. Scattered to widely scattered wet thunderstorms are expected in all of those areas, except Montana which may have some dry lightning. Southern California, southern Nevada and southern Utah have a slight chance of some thunderstorms. High temperatures will range from the mid 60's along the Pacific Northwest Coast, 90 to 115 degrees in the desert Southwest, and from the 80's to low 90's in the remainder of the West. High pressure will bring warm

and dry weather to the northeastern U.S. Winds will be light, with high temperatures from 80-85 degrees. The potential remains for increased fire activity through the holiday weekend.
