

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, AUGUST 12, 1996 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

CURRENT SITUATION: Increased fire activity was experienced in the Northwest, Northern Rockies, Eastern Great Basin and Rocky Mountain Areas. Two additional Type I Incident Management Teams were committed in the Northwest Area. Type II Incident Management Teams were committed in the Northern Rockies, Eastern Great Basin and Rocky Mountain Areas. Good progress was reported on fires in Northern California. Resource mobilization through NICC has increased.

Northwest Large Fires:

AIRWAY HEIGHTS, Washington State. This fire is burning near Fairchild Air Force Base and the Spokane, WA. International Airport. Two structures have been destroyed with several hundred more being evacuated. The flame front is reported to be 3 miles wide. Washington State has requested a declaration of emergency and Federal Emergency Management Agency assistance. No containment or resource information was reported.

WHEELER, Umatilla NF. A State Type II Incident Management Team (Hunt) is assigned. This fire is 15 miles southwest of Heppner, OR. Five structures have been confirmed destroyed, including 3 permanent residences. Forty other homes have been evacuated, however, residents were allowed to return to remove belongings. The major threat is to the scattered residences in the area and commercial timber. Crew movement to the fire is one of the major problems reported.

WILDCAT, Malhuer NF. A Type II Incident Management Team (Johnson) is assigned. A Type I Incident Management Team (Dubois) has been ordered and is scheduled to take over the fire today. The fire is 10 miles southeast of John Day, OR. Threats are to permanent and summer residences, a resort and heavily used recreation areas. Extreme fire behavior occurred and the fire has spotted onto private land. Turbulence and dense smoke have made reconnaissance and aerial attack of the fire impossible. No containment or resource information was reported.

SIMNASHO, Warm Springs Agency, BIA. A Type I Incident Management Team (Porter) has been assigned. This fire is burning in grass, brush and timber 10 miles north of Warm Springs, OR. Structure protection was successful yesterday. Suppression efforts are hampered by the terrain. No containment or resource information was reported.

SLOAN'S RIDGE, Wallowa-Whitman NF. A Type I Incident Management Team (Payne) is assigned. The fire is burning in subalpine fir and lodgepole 12 miles northwest of Sumpter, OR. Heavy spotting is a problem on the northern portion and the eastern flank. Major efforts are concentrated on the northeast corner of the fire. Access to the southern end of the fire from the town of Sumpter is a major logistical problem. Numerous mine shafts and explosives are in the area. Mining claims and a historic cabin are threatened. No containment or resource information was reported.

SALT CREEK, Wallowa-Whitman NF. A Type II Incident Management Team (Lukens) is assigned. A Type I Incident Management Team (Bailey) has been ordered and will arrive today. The fire is burning in mostly light fuels with scattered timber in deep ravines of the Hells Canyon National Recreation Area. The fire made major runs to the north, with crews concentrating their efforts on that portion. Smoke continues to limit visibility. No containment or resource information was reported.

HEAVEN GATE, Wallowa-Whitman NF. Plans are to move the Type II Incident Management Team (Lukens) to this fire after transitioning the Salt Creek fire to the Type I Incident Management Team. This fire is burning across Hells Canyon from the Salt Creek fire. Extreme burning conditions were reported. The fire is moving to the north in dense, continuous fuel. No containment or resource information was reported.

ASHWOOD/DONNEYBROOK, Oregon State. This fire is burning around the community of Ashwood, OR., 20 miles northeast of Madras, OR. Rural and volunteer fire departments have been working the fire. The state Conflagration Act has been invoked in order to make resources available. Residences in Ashwood are threatened. The fire is estimated at 50,000 acres. No containment or resource information was reported.

COYLE BUTTE, Ochoco National Forest. This fire is burning in pine and fir thickets 24 miles north of Prineville, OR. Line has been completed but mop-up will be slow due to heavy fuels.

BENCHMARK, Umpqua NF. This fire is burning in slash, brush and reproduction 20 miles northwest of Prospect, OR. Fifteen loads of retardant were utilized yesterday to control spots. The fire has burned unevenly and the potential for reburn is high.

FIFERS, Colville Agency, BIA. The only information reported was that in the table below.

BROWN BUTTE, Vale District, BLM. This fire is burning near the town of Adrian, OR. Structures in the area were threatened. No containment or resource information was reported.

One fire is in a confinement suppression strategy totalling 740 acres.

Northern Rockies Large Fires:

CLUBFOOTE COMPLEX, Northern Cheyenne Agency, BIA. A Type II Incident Management Team (Stires) is assigned. This fire is burning in dense timber 6 miles from Lame Deer, MT. The complex is comprised of the BAD WARRIOR, FOUR CORNERS, and CLUBFOOTE fires. Dozer line was completed around all three fires. Retardant was utilized for a small portion of lost line on the Bad Warrior fire. High temperatures and low relative humidities continue to make suppression efforts difficult.

MORIGEAU, Flathead Agency, BIA. This fire is located near Hot Springs, MT. Homes and outbuildings were threatened by the blaze yesterday. Air support helped reduce fire spread. Extreme burning conditions have hampered containment objectives. Current concerns include structures and agriculture land.

WILLOW CREEK, Bitterroot NF. A Type II Incident Management Team (Spradlin) is assigned. The fire is burning in steep, rugged terrain southwest of Missoula, MT. Structure protection is in place for a home within a half mile of the fire. The blaze is currently moving away from this structure. Dry weather and strong winds are hampering control efforts.

MOOSE BUTTE COMPLEX, Nez Perce NF. A Type II Incident Management Team (Cowin) is assigned to this incident south of Elk City, ID. The MOOSE BUTTE and LITTLE GREEN MOUNTAIN fires are included in this complex. Suppression forces have made good progress on the Moose Butte fire. Air support has aided firefighters on the Little Green Mountain fire. Crew transport into these remote fires has made containment objectives difficult to achieve. Concerns are for strong winds, torching and spotting through the next burning period.

WARRIOR'S FACE, Bitterroot NF. This prescribed natural fire, 25 miles south of Hamilton, MT, began 8/9 and has burned actively over the past two days. An engine is assigned to prevent rolling debris from affecting traffic. Smoke has caused visibility problems. This will be the last report on this fire unless significant activity occurs.

One fire is in confinement suppression strategy totalling 220 acres.

Eastern Great Basin Large Fires:

A National Area Command Team (Caplinger) is assigned to the Richfield District, BLM and Fishlake NF.

APPLE VALLEY, Boise District, BLM. This fire is located 17 miles

northwest of Caldwell, ID. Continuous fuel loading has limited control efforts. The fire jumped Interstate 84. Structures and microwave stations are threatened. Ground resources are utilizing indirect fire suppression tactics.

HENS PEAK, Fishlake NF. This fire is located 11 miles northeast of Loa, UT. Strong winds pushed this confinement fire over the boundary. Three USFS roads and the Great Western Trail have been closed. Timber sales and spruce plantations are currently threatened.

HONEY BOY, Cedar City District, BLM. A Type II Incident Management Team (Martin) is assigned. This fire is 5 miles southeast of Milford, UT. Good progress was made on the fire. Burnout operations on the southeast side of the fire have been completed.

ADELAIDE COMPLEX, Fishlake NF. A Type II Incident Management Team (Shive) is assigned. The fires are 5 miles southeast of Kanosh, UT. The complex consists of the ADALADE and DOG MOUNTAIN fires. Good progress was made toward containment on the south, east and west portions of the fire. A small slopover was quickly contained. High temperatures and low humidities are hampering suppression efforts. Some demobilization will begin today.

VIVIAN, Uinta NF. A Type II Incident Management Team (Furlong) has been reassigned from the Tank fire. This fire is burning 5 miles northeast of Orem, UT. Burnout operations were in progress last night to keep the fire from threatening structures in the bottom of the canyon. Structure protection engines are in place if needed. No other information was received.

BIG BRUIN, Payette NF. This Prescribed Natural Fire is burning in the Frank Church River-of-no-Return Wilderness. The fire is currently 6,800 acres, and is being monitored by aircraft and a lookout tower. The fire is moving east northeast towards the main Salmon River. This will be the last report unless significant activity occurs.

Three fires are in a confinement suppression strategy totalling 6,104 acres.

Rocky Mountain Large Fires:

MONCRIEF RIDGE, Big Horn NF. This fire is burning 7 miles from Story, Wy. A Type II Incident Management Team (Hawkins) has been ordered and will be in place this morning. Control problems are steep terrain, poor access and a combination of light and heavy fuels.

MURPHY RIDGE/BEAR CREEK COMPLEX, Medicine Bow NF. A Type I Incident

Management Team (Wands) is assigned. The complex is 10 miles northeast of Garrett, WY. Crews have completed all burnout operations. The threat to structures is now considered low. The demobilization process has begun.

Western Basin Large Fires:

DRIPTING SPRINGS, Lake Mead NP. This lightning-caused fire is burning 10 miles northwest of Laughlin, NV. The fire moved rapidly through pinyon-juniper fuels. A radio repeater 2 miles from the fire is threatened. Steep terrain is causing control difficulty.

DIXIE, Carson City District, BLM. The fire is burning in pinyon-juniper 50 miles northeast of Fallon, NV. Inaccessibility and steep terrain are hindering containment objectives.

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 434,199 acres.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED ***
*** IN EASTERN MONTANA FOR DRY LIGHTNING AND GUSTY WEST WINDS ***

*** A FIRE WEATHER WATCH IS POSTED IN EXTREME SOUTHEAST ***
*** OREGON, CENTRAL/SOUTHERN IDAHO AND WESTERN WYOMING FOR DRY LIGHTNING ***

An upper level ridge of high pressure, centered over Utah, will continue to produce hot temperatures and very low humidities across much of the

West. Sub-tropical moisture in the desert Southwest and along the Sierra Nevada Mountains in California will push northward into Idaho and then into eastern Montana and Wyoming. An upper level trough and dry cold front will move out of eastern Montana into the Dakotas. Thunderstorms in Arizona and New Mexico will be wet. A little more moisture is expected with the thunderstorms in California. Southwest Utah, Nevada, southeast Oregon, Idaho, Wyoming and eastern Montana will have isolated to widely scattered thunderstorms, generally dry. High temperatures will range from the 70's in western Washington to near 112 in the desert Southwest, most areas will be in the 90's to 105. Relative humidities in Utah and western Colorado will drop into the single digits.
