

INCIDENT MANAGEMENT SITUATION REPORT
Sunday, October 27, 1996 - 0900 MST
NATIONAL PREPAREDNESS LEVEL II

*** SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME ***

CURRENT SITUATION: Two new fires were reported yesterday in southern California. Favorable weather conditions allowed good progress on several of the large fires in California. Resource mobilization through NICC remained minimal.

Southern California Large Fires:

SUR, Los Padres NF. A Type I Incident Management Team (Giachino) is assigned. Good progress continued on line construction. Structure protection remains in place in the Pfeifer Big Sur State Park, along the North Coast Ridge Road and Highway 1. Demobilization is expected to begin tomorrow.

CALABASAS, Los Angeles County, California. The fire experienced strong northeast winds yesterday. The fire was not declared contained due to winds and hotspots inside control lines. Good progress continues on mop-up operations. Additional demobilization will begin today.

Otay #322, San Diego Ranger Unit, California State. The fire received significant rainfall Friday night. Full containment was expected last night. Heavy demobilization is anticipated today.

WATERMAN #3, San Bernardino NF. The fire is located 1 mile north of San Bernardino, CA. Strong winds hindered suppression efforts. Residents on the north end of San Bernardino were evacuated early this morning. No other information available.

SIERRA, Riverside Ranger Unit, California State. The fire is located 1 mile west of Riverside, CA. Wind gusts of up to 20 MPH have hindered containment objectives. No other information available.

OUTLOOK:

A RED FLAG WARNING IS POSTED THROUGH THIS AFTERNOON IN THE NORTHERN SACRAMENTO VALLEY BELOW 2,000 FEET AND FOR THE WEST SLOPES OF THE SIERRA NEVADA FOR GUSTY WINDS AND LOW HUMIDITY

A strong early winter storm will be located over the southern California coast today. Easterly winds will affect all of California. The higher elevations of California, Arizona and New Mexico will have rain and snow showers. High temperatures will be in the 30's through the 50's in the mountains and from the 60's to the 80's in the lower elevations of southern California, Arizona and New Mexico.
