

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, JUNE 8, 1997 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION: Minimal fire activity was reported yesterday. Fire dangers continue to range from high to extreme in southern California, Arizona, and Minnesota.

OUTLOOK: An upper level low pressure system centered over Arizona and New Mexico continues to spread moisture throughout much of the desert southwest, Great Basin and Rockies. Scattered showers and thunderstorms will occur mainly during the afternoon and evening hours. Southwest Arizona will be mostly sunny with slightly warmer temperatures. High temperatures will range from the 60's and 70's in the north to the 80's and 90's in the southwestern deserts. California will be mostly sunny with a few afternoon thunderstorms over the mountains and southern deserts. Coastal areas will see patchy morning fog and low clouds. Coastal and mountain temperatures will range from the 60's to 70's. The interior valleys will have temperatures in the 80's. The southern deserts can expect high temperatures in the mid 90's. Alaska will experience showers in the southern part of the state and scattered afternoon showers or thunderstorms in the interior. High temperatures will be in the 60's to mid 70's. Minnesota will be mostly sunny with high temperatures in the 70's to lower 80's.
