

INCIDENT MANAGEMENT SITUATION REPORT

WEDNESDAY, JULY 1, 1998 - 0530 MDT

NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Significant fire activity persisted in the Southern Area. Wildfires have affected all of the 67 counties in Florida. The Rocky Mountain and Southwest Areas continue to battle large fires. The National Interagency Coordination Center processed orders for an Area Command Team, equipment, aircraft, crews, smokejumpers and miscellaneous overhead for these Areas. Minor initial attack activity was reported in most other Areas. Very high and extreme fire indices were reported in Florida, Georgia, Mississippi, Texas, New Mexico, Arizona, Colorado, Utah, California and Nevada.

SOUTHERN AREA LARGE FIRES:

JACKSONVILLE COMPLEX, Florida State. This complex is southwest of Jacksonville. Lightning started these fires, and arson and illegal debris burns have caused additional problems.

ORLANDO COMPLEX, Florida State, Brevard, Orange, Osceola and Seminole Counties. A Type I Incident Management Team (Birch) is assigned. Extreme fire behavior on the Farmington (previously called the Break) fire required residents in the area to be evacuated. Low relative humidity, high temperatures and variable winds are hindering control efforts.

WACCASASSA COMPLEX, Florida State, Alachua, Putnam and Marion Counties. A Type II Incident Management Team (Hebb) is assigned. Four new fires were added to this complex.

BUNNELL COMPLEX, Florida State, Flagler and St. Johns Counties. A Type II Incident Management Team (Hendricks) is assigned. Firefighters are concentrating on the Rodeo Road fire, which straddles the Volusia and Flagler County lines. Fire activity has increased on numerous fires in the complex, causing them to escape containment boundaries. Weather conditions are challenging suppression efforts.

BUNNELL-VOLUSIA COMPLEX, Florida State, Volusia County. A Type II Incident Management Team (Kearney) is assigned. The fires were very active yesterday. Burnout operations were postponed due to extreme weather conditions. A subdivision one mile north of Lake Ashby was evacuated due to a new start. Helicopter bucket drops provided structure protection for homes in this area.

WITHLACOOCHEE, Florida State, Hernando, Pasco, Lake Sumter and Citrus Counties. A Type II Incident Management Team (Votolina) is assigned. Seven fires in this complex are uncontrolled. More than 200 homes in the vicinity are threatened.

SUWANNEE COMPLEX, Florida State, Columbia, Union, Bradford, Baker Counties. A Type I Incident Management Team (Wands) is assigned. Unified Command is in effect with Florida State. This complex consists of 30 fires, six of which are not contained. Additional fires were ignited by a passing thunderstorm. Extremely low fuel moisture, high temperatures and strong winds have hampered suppression efforts.

OAK HEAD COMPLEX, Osceola National Forest. A Type I Incident Management Team (Greenhoe) is assigned. These fires are 20 miles north of Lake City. Two new starts were added to the complex yesterday. Mop-up continues on most fires in the complex. Demobilization of resources has begun.

MERRITT ISLAND COMPLEX, Merritt Island NWR. This fire is in Brevard County. Firefighters continue to mop-up the fires in this complex.

SOUTHWEST AREA LARGE FIRES:

OSO, Santa Fe NF. A Type I Incident Management Team (Bateman) is assigned. This fire is ten miles north of Los Alamos. Strong, shifting winds from a thunderstorm caused the fire to make a significant run yesterday. Structure protection for the Santa Clara Ranger Station continues. Private property and structures on the north side of the fire are threatened.

RIVERBED, Pima Agency. This fire is 20 miles southwest of Phoenix. Heavy brush, salt cedar, mesquite and tamarack trees have fueled this blaze. Firefighters are making good progress on line construction. Containment was expected last night.

PALO DURO RANCH, Lake Meredith NRA. This fire is outside of Fritch. One picnic shelter was burned. Resource demobilization has begun.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	\$\$\$ CTD

PALO DURO	LAP	TX	5,000	75	7/1	143	3	10	0	1	NR	36K

ROCKY MOUNTAIN LARGE FIRES:

MUDDY CREEK, Pike-San Isabel NF. A Type II Incident Management Team (Hart) is assigned. This fire is burning in heavy down fuels five miles west of Rye. Some torching was observed yesterday. Airtanker drops have prevented the fire from growing larger. Inaccessible terrain has hindered control efforts. Camp Jackson, a YMCA camp, is immediately threatened.

BEAR TRACKS, Arapaho-Roosevelt NF. A Type II Incident Management Team (Sexton) is assigned. This fire is ten miles west of Evergreen. Steep, rocky terrain and numerous snags pose safety concerns. The interior of the fire continues to burn actively. Inaccessibility has made crew transport to the fire difficult.

WHITE, Pike-San Isabel NF. A Type II Incident Management Team (Hessler) is assigned. This fire is three miles northwest of Grants. Aggressive fire suppression and air support slowed the spread of the fire. Firefighters were aided by cooler temperatures and higher relative humidity.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	\$\$\$ CTD

ALASKA LARGE FIRES:

CARLA LAKE, Fort Greely Army Base. This fire is 15 miles southwest of Delta Junction. Crews worked to secure the eastern perimeter. The fire was active on the west side and firefighters were able to keep these flare-ups within the perimeter. Firefighters continued with rehabilitation efforts.

OUTLOOK:

A FIRE WEATHER WATCH HAS BEEN POSTED FOR LOW RELATIVE HUMIDITY IN NORTHERN FLORIDA. Florida and Georgia will be partly cloudy and hot with scattered showers and thunderstorms. Temperatures will range from the 80's and 90's in Georgia and from the 90's to near 100 in Florida.

New Mexico and west Texas will be partly cloudy. New Mexico will have slightly lower temperatures and a few afternoon and evening thunderstorms in the central mountains and eastward. High temperatures will range from the 80's in the mountains to 105 in the southern lowlands.

Arizona will continue to be sunny and hot. Minimum relative humidity will range from 5-17%. Temperatures will be in the 80's and 90's for most of the state, with highs reaching 116 along the Colorado River.

Colorado will be mostly sunny in the morning. By afternoon, it will be partly cloudy in the west and mostly cloudy in the east. Scattered afternoon and evening showers and thunderstorms are forecast east of the Rocky mountains. Temperatures will range from the 70's and 80's in the mountains, to 105 in the southwestern portion of the state.

Southern Nevada and southern Utah will be sunny and hot. Winds will be from the southwest at 5-15 MPH with gusts in southern Utah up to 30 MPH. Minimum relative humidity will range from 2-12%. High temperatures will range from the mid 90's to 116 in the deserts.
